

East Lothian Council

EIR Ref: 2018/544254

How much the council has spent on removing asbestos in council-owned schools during the last five financial years?

Please break down your answer by each month, and include the dates which asbestos removal was carried out.

Please refer to Appendix I overleaf.

Please note that the transaction date refers to the payment and is not the date that asbestos containing materials were removed. To establish exact dates would involve staff scrutinising each of the jobs listed for the completion dates. In some cases, it would also be necessary to match up the survey, removal and analytical dates.

Colleagues estimate that it would take up to four days (28 hours) of staff time to complete this task. In view of this, East Lothian Council considers that Regulation 10(4)(b) of the Environmental Information (Scotland) Regulations 2004 applies: "*A Scottish public authority may refuse to make environmental information available to the extent that– the request for information is manifestly unreasonable;*"
