

East Lothian Council

EIR Ref: 2018/549967

Please provide me with data regarding pest infestations in residential properties in your council area, for the last 10 years (including the current financial year to date). This data should include:

- For each financial year, and if possible by month, how many infestations have been reported to the council? If possible, please give an additional breakdown by property type (i.e. flat/house), and type of infestation i.e. rats, mice, bed bugs etc.

Please see spreadsheet attachment.

- For each financial year, and if possible by month, how many of these infestations have been treated by the council?

Please see spreadsheet attachment.

- For each financial year, please provide me with a table of post codes where an infestation was reported, and how many reports were reported within that post code. If this is not possible to do for all years, then please just provide data for 2017/18.

Please see spreadsheet attachment.

- For each financial year, tell me how many staff posts (FTE equivalent) there were/are for pest controllers.

NIL - East Lothian Council has no staff posts for pest control.
