Subject: Rat Update - Pear Tree West Road
Date: 15 August 2022 12:56:07

Hi

I have just called _____, former Meadowpark Manager and now Bright Stars Area Manager for Haddington, who I worked directly with on the rat issue in June.

_____ has confirmed that Amisfield Pest Control saw a rat on CCTV moving from the children's cloakroom on the ground floor towards the children's food room. He thought it left the building at this point. The body of one male adolescent rat was found by pest control behind the blocked off shed in the children's play area. There was no further rat activity detected in the building by pest control resulting in clean notices being given allowing the nursery to re-open.

Warmest regards
