

## **Our commitments to partnering with providers to deliver care that truly meets people's needs.**

### **Collaborative Approach**

We will work with communities, providers, advocacy bodies, carers, supported people and staff to commission, design and develop services.

### **Prevention and Early Intervention**

We will focus on preventative and early intervention outcome-focused approaches that promote independence, self-management and recovery.

### **Community Based Services**

We will actively develop, enhance and promote community and home-based services that support Right Care, Right Place, Right Time.

### **Deliver Value**

We will promote collaboration, innovation and value for money when contracting services.

### **Utilise Technology**

We will seek and identify means of using technology to enhance and transform services.

### **Ethical Commissioning**

Contracting decisions will consider service sustainability, fair work, career pathways, trade union recognition and the environment as well as price.

### **Equity and Access**

We will seek to address health inequalities and promote equal access to services regardless of geography or population.

### **Supporting People**

When contracting services our focus will be on supporting people and delivering improved outcomes for individuals and carers.

### **Legally Compliant**

We will ensure compliance with relevant legislation and national policy.
