6. Review procedure

The Local Review Body will decide on the procedure to be used to determine your review and may at any time during the review process require that further information or representations be made to enable them to determine the review. Further information may be required by one or a combination of procedures, such as: written submissions; the holding of one or more hearing sessions and/or inspecting the land which is the subject of the review case.

Please indicate what procedure (or combination of procedures) you think is most appropriate for the handling of your review. You may tick more than one box if you wish the review to be conducted by a combination of procedures.

- Further written submissions
- One or more hearing sessions
- Site inspection
- Assessment of review documents only, with no further procedure

If you have marked either of the first 2 options, please explain here which of the matters (as set out in your statement below) you believe ought to be subject of that procedure, and why you consider further submissions or a hearing necessary.

7. Site inspection

In the event that the Local Review Body decides to inspect the review site, in your opinion:

- Can the site be viewed entirely from public land?
- Is it possible for the site to be accessed safely, and without barriers to entry?

Statement:

The existing property is within the boundaries of Haddington. The house is a two storey building with a mono pitch roof clad in tiles.

The applicant applied for planning consent to demolish existing garage and extension to make way for a new two storey extension.

The basis of the refusal is the new roof is different to the existing mono pitch roof.

The planning officer was in favour of granting consent but his line manager was not.

During the discussion stage the client offered to change the roof design and 4 different designs were submitted. The planning officer's supervisor refused to allow anything other than continuing the mono pitch line of the roof down to the boundary. That would have left the top rooms with a wall height next to the existing building of 1900mm down to 1350mm at the boundary. That is not a practical or feasible design.

There have been no objections to, the existing design by the neighbours so they must have thought the design was acceptable.

The argument that the extension is predominate is not whole true as it is hidden in part by the house next door by the staggered layout of the houses.

I would ask the Review Committee to allow Planning Consent for this application.

If there are reasons why you think the Local Review Body would be unable to undertake an unaccompanied site inspection, please explain here:

NONE
