

Local Review Statement Flat 4, 133 New Street, Musselburgh, East Lothian

Introduction

Houghton Planning Ltd have been instructed by Ms Ruth Shiraz (hereafter the applicant) to prepare a local review statement to accompany a local review regarding the refusal of planning application ref: 23/00722/P for "Change of use of flat to short term holiday let and flat (Retrospective)" at Flat 4, 133 New Street, Musselburgh, East Lothian.

Ms Shiraz has owned the property since September 2022, and has used the property for short term letting purposes since then.

Ms Shiraz and her family hail from East Lothian, and she also uses the flat herself frequently despite living away from the area.

The planning application was refused under delegated powers on 13th October 2023 for the following single reason:

"The holiday let use of the flatted property is incompatible with and harmful to the amenity of the occupants of other flatted properties used as residential dwellings within the residential building of 139 New Street and as such is contrary to part e) of Policy 30 of National Planning Framework 4 and Policy RCA1 of the adopted East Lothian Local Development Plan 2018".

This statement starts by describing the site, includes details on how the property is managed, and guest rules, but then follows the same format as the Report of Handling.

Site Description

Number 133 New Street, shown below, is a block of apartments that is situated towards the western end, and on the south side, of New Street overlooking the beach and harbour in Musselburgh.

Flat 4 on the second (top) floor is an 84sqm property comprising an open plan living/dining area, kitchen, and three bedrooms. All of which are served by a bathroom. Photographs are included with the application. A floorplan of the property is also included.

There is a secure resident's car park located under the building, with access from the front of the property, as well as visitor parking to the front. There are 42 shared spaces for visitors outside the apartment complex in total, which are rarely all filled. There are usually at least 15-20 free spaces (often more). In the time the applicant has owned the apartment, parking has never been an issue for visitors, or guests.

Specific Guest Rules/Information about the short term letting of the property

House rules include the following:

- Guests are vetted, as far as possible, by checking previous stays information online, and asking guests to provide, in confidence, some information on themselves, and the purpose of their visit.
- The applicant does not allow any single sex groups, nor any groups where guests all are under 25. There is a six guest limit and, whilst children are permitted, there is a no pets policy.
- Absolutely no parties, or events of any kind, are permitted.
- Guests are requested to be quiet after 11pm.
- There is a no smoking policy within the property.

- Check-in times are between 3 pm and 11 pm, and the applicant does not allow any arrivals after 11 pm. Guests must check out by 10am, but are asked not to leave before 8am unless absolutely necessary.
- The minimum stay is 3 nights. Max has been 8 nights. The average is 3 or 4 nights.
- Maximum guests are 6, the average is 4.
- There is a key safe for access.
- The cleaners empty the bins.
- It is advertised online, and the applicant manages it herself.

Relations with neighbours

The applicant has had no direct complaints from any neighbours about anti-social behaviour, and does everything possible to maintain good relations.

Development Plan

The development plan policies summarised in the Report of Handling are agreed.

Representation

Before addressing the specific representations, it should be stressed that the applicant has had no direct complaints from any neighbours about anti-social behaviour. The applicant is, therefore, surprised, to say the least, at various issues now being raised.

Before addressing these, however, it is only fair that councillors balance what has been said against the reality, which is that the property is professionally managed, well maintained, and is occupied by guests who normally understand their responsibilities, and act accordingly. If there has been an odd guest who has not totally behaved themselves, and acted responsibly, and, to say it again, this is the first the applicant has heard about these issues, then that seems little to go on to justify refusal of planning permission.

To put this in perspective, the applicant considers that the comings and goings from this flat are no different from what would occur were it to have young professional tenants, or students, living there. These types of occupiers may have the same, or a greater degree of, movements than those people staying in the flat on holiday.

Permanent residents can have vastly different movements depending on their student status, employment, leisure interests, family circumstances, health, or just their way of living being a night owl rather than a day person, for example. A doctor or nurse may work shifts coming in at odd times; a family with teenage children might enter and leave the flat many times during the day and night, and can be very noisy; a single person with care needs might be visited by carers several times a day. Users of a self-catering property are, therefore, unlikely to exhibit markedly different characteristics to more permanent residents.

Anti-social behaviour is just as likely in residential use as self-catering use. It is probably more prevalent from permanent residents because they feel more secure in their occupancy whereas a guest can be asked to leave immediately.

Servicing of self-catering accommodation is also not a particular difference because many residential occupiers use cleaners on a regular basis, especially if the occupier is in poor health.

Many tenanted and owner-occupied flats will have deliveries from the likes of Amazon, and takeaways at all times of the day and night, and probably far more than people staying on holiday who will not have the former, and are more likely to eat out spending money in local eateries that desperately need the custom, with the ongoing cost of living crisis.

Councillors also need to bear in mind, in considering the representations, that Police Scotland have been consulted and "advise that there have been no police incidents at this address." The Council's Environmental Health team have noted no issues, and nor has the Council's Antisocial Behaviour Team.

It is also worth noting that the absence of complaints in relation to this property is the norm in East Lothian, with the Council stating in its report in 2022 in relation to the possibility of a Control Area being introduced in all, of parts of, East Lothian that:

"There is little evidence at the moment to show that short term let properties are causing these problems, or that the issue is significant enough for a complaint to be made. Between the 1st January 2018 and October 2021, there were only two complaints received by East Lothian Council relating to Short Term Let (AirBnB) properties. This shows an overall low level of antisocial behaviour problems associated with these properties."

Finally, councillors must consider all representations understanding that there is an 'echo chamber' effect going on where people opposed to short term lets are availing themselves of social media groups that share similar views and, inevitably, are reading press articles that do not always present a balanced view. The comments that have been made here must, therefore, be treated with extreme caution and, although the applicant has responded below, it is clear that most are unsubstantiated gossip, and the sort of comments that are being submitted across Scotland by people with a certain polarised agenda.

With that in mind, the applicant's specific comments on the summary of representations in the Report of Handling are as follows:

(i) number of strangers using the communal stairwell with an increase in noise into late hours with concerns raised over comings and goings as a result of this intensity with cleaners with some occasions where the main access is left open by short term occupants - As stated above, no such incidents have

been reported to the applicant. If they had, the applicant would have dealt with them. Also, these sorts of comments are easily made, are often attributed to short term let use, when they may have had nothing to do with this property, and are seldom accompanied by the evidence. No evidence has been submitted here to support these allegations, as far as the applicant is aware. Therefore, they should be given no weight whatsoever.

- (ii) experiences of people stood outside drinking and smoking and being generally loud This cannot be levelled at the current property. Much, if not all, of this is related to the use of the harbour car park by people for anti-social activities, which has included blaring music, cars revving, people talking/shouting/drinking/smoking into the early hours, and leaving their litter. This has been reported several times by the applicant, and many other residents, and has not been addressed by the authorities.
- (iii) block of 133 is not suitable for STLs with five of six flats occupied by elderly and middle-aged permanent residents and is disruptive to permanent residents The age of the permanent residents is irrelevant. Most of the guests are of a similar age, and behave themselves in a similar manner to the permanent residents. Indeed, sometimes they are better behaved, according to what some guests have told the applicant.
- (iv) noise in the stairwell is a problem holiday comers do not live between the regular hours of permanent residents That is also not true. Just because someone is on holiday does not automatically mean they keep 'odd' hours. As already explained, many permanent residents may keep 'odd' hours, i.e. are more active in the evening, and at night.
- (v) owner lives away and is concerned with income This is a business that is true, but the fact that the owner is not in the immediate vicinity is irrelevant. If not a short term let, this property would be a second home, and the resident in that scenario (i.e. the applicant) would still be living away from the property.
- (vi) security is a major problem with the key to the flat being the same as the key to the communal stair with the key box located on a wooden fence accessible by the public 24/7 access The key box is safe, secure, and there has never been any incident with anybody trying to break into it.
- (vii) holiday let residents are not aware of the council's rubbish disposal or recycling policy and do not dispose of waste effectively or properly Guests are made aware, and anyway the waste is generally taken away by the cleaners. It is not dealt with by the guests. Also, putting rubbish in the wrong bins is something that is common in every block of flats, and every road, in Scotland.

- (viii) Increased number of self-catered accommodations which means no knowing stranger from neighbour As already explained above, 'strangers' entering a building is common. It is no different in a building that is permanently occupied than one where short term letting is taking place. Many people can live for years in a block, and never know who their neighbours are, or their family members, or tradespeople visiting them, or delivery drivers.
- (ix) Instances where fights have broken out in car park and general noise nuisance from banging on doors at night That is nothing to do with the letting of this property. It is known that anti-social activity takes place in this area, and the Council's Antisocial Behaviour Team make it clear that this issue is known about, and nothing to do with short term letting. Also, these sorts of comments are easily made, are often attributed to short term let use, when they have nothing to do with people staying there, and are seldom accompanied by the evidence.
- (x) Suspicious nightly activity from men Again, that is nothing to do with this being a holiday let.
- (xi) Arrival/departures can sometimes be during anti-social hours with associated noise That almost never happens. The applicant does her best to ensure that everyone arrives, and leaves, as per the guest rules.
- (xii) Left previous flat due to STL as community was destroyed where does this stop This is a purely political comment from someone with a particular agenda to prevent small tourism businesses from flourishing, and supporting the local economy, and the many, many businesses like pubs, restaurants, and shops, that rely on the trade that guests bring. Not to mention the small servicing businesses that support short term lets, and employ local people, and will see their turnover impacted significantly if short term lets are forced to close by the planning system.
- (xiii) Already two STLs in No.139 which has resulted in ASB issues which has involved the police That is again not true. Police Scotland have responded on this application, and advise that there have been no police incidents.
- (xiv) Detrimental impact on health This is fake news. There is no evidence that in any way connects short term lets with the health of neighbours.

Planning Assessment

The applicant is aware of the issues the case officer has raised, which follow a theme across all applications being considered in East Lothian, and can comment as follows:

- Turnover of guests Unlike many short term lets, the turnover of guests is relatively infrequent at this property. Although there is a three day minimum stay, it is rare that anyone takes the property for only three days, with those stays mostly in winter months. More commonly, people stay in the property for at least a week, and often for much longer periods, as explained above. Therefore, neighbours do not experience an obvious increase in comings and goings to the property, as against what they would experience with owner occupation, or a tenant. Also, what comings and goings there are, tend to be during the day, with any changeover, and cleaning of the property, being during working hours. Although guests can arrive up to 10pm, this is exceedingly rare, and most arrive in the afternoon, and leave mid-morning.
- Luggage Most people using the property come with a rucksack, or with a small suitcase. Because of the vetting that goes on, and because most guests are seasoned holidaymakers, they are conscious that they need to be quiet using communal areas, and not to make noise by trying to drag their cases up the stairs rather than carrying them. Also, because of the vetting, if a guest is staying longer term, or needs assistance with luggage, then the management company is available to help to move luggage to further ensure that a kerfuffle in the stairwell is avoided.
- Overall visits to the property It is often stated that with guest turnover, and cleaners visiting a property, that the number of comings and goings per day from a short term let are higher than that for a flat that is owner occupied, or tenanted. That is actually not borne out by the reality, which is that many flats of this size could have a number of young professionals living in them as tenants who all leave the flat, and return, at different times, and may also have cleaners, delivery drivers, friends, and relatives, visiting them at all sorts of times day and night. The overall effect is that there is little noticeable difference between the use of the flat as a short term let, and what could happen if the applicant put in tenants, which is what would happen here if short term letting is not permitted to continue.

As a final thought, if councillors are swithering on the residential amenity issue, then they should be aware that granting a temporary planning permission is available to them as an option to test whether the use can take place without undue impact on neighbours, or whether the sort of comments made in representations, or suggested by the case officer, are, instead, the case. Many other authorities across Scotland have taken this option, including for short term lets. Clearly, the applicant would prefer a permanent planning permission, but a three year temporary consent, in line with a hopefully soon to be granted licence, would allow the use to continue, and for tangible evidence to be gathered rather than unsubstantiated allegations as to the impacts.

For these reasons, the proposal complies with part e) i of Policy 30 of NPF4, and with Policy RCA1 of the adopted East Lothian Local Development Plan 2018.

In terms of Policy 30 e) ii, a Council consultation in 2022 on the possibility of Control Areas included some information on the number of short term lets in individual towns. For Musselburgh, the report stated that in 2022 the town had a total of 12,639 dwellings, including flats, 43 of which were being used as short term lets, which is 0.3% of the total. In the town centre, the respective figures were 819 properties, of which 7 were short term lets, or 0.85%. The short term let licence register suggests only four properties in Musselburgh have applied for a licence, although it must be said that a postal town is not included for every property listed thereon. However, that aside, it suggests the number of short term lets is as low, if not lower, than the 2022 report suspected. The town-wide percentage for Musselburgh was stated in the 2022 as being lower than that for Dunbar, North Berwick, and Haddington, although on a par with Gullane. The town centre percentage was lower than all these towns, and significantly lower than for North Berwick and Gullane. More significantly, the percentages for Musselburgh (whole town and town centre only) are lower than the national average of 1.2% (Scottish Government 2019 - Research into the impact of short-term lets on communities across Scotland).

Against that background, the loss of this one flat to the housing supply for the time it is a short term let is negligible, and refusing this application will not in any way help with the 'constrained housing system' noted by the Council's Housing Strategy & Development Service.

There may be a housing shortage in East Lothian, and Musselburgh, but this is not being caused by short term lets, but is rather a multifaceted issue that seeking to close short term lets will not solve. Rather, it needs a multi-agency approach, including the Council, to kick-start new housebuilding, increase the delivery of affordable housing, and to bring back into use the many empty properties across the local authority area.

As for the economic benefits, councillors only need note the comments of the Council's Economic Development Service Manager on an application for a short term let at 139 New Street to understand those (Report of Handling enclosed).

"The Council's Economic Development Service Manager advises that there are demonstrable local economic benefits delivered by all types of short term holiday lets in East Lothian and that existing provision of this type of accommodation must be retained, protected and supported where there is no demonstrable impact on local amenity, the character of the area or loss of residential accommodation. In the particular circumstances of this case it is stated that (i) the property will provide high quality tourist accommodation attracting visitors to Musselburgh and the surrounding area providing economic benefit; (ii) there is a demonstrable economic benefit to having a wide range of accommodation types in East Lothian with the tourism sector contribution £155m to the local economy in 2021 and supporting 10% of the workforce; (iii) non-serviced accommodation (short term holiday lets) contributes positively to the local economy (£279m in 2019) and the applicant's flat accounts for 5 bedspaces and a potential annual economic impact of £113,635 and 2.5FTE jobs; (iv) there is an increasing number of overnight stays in East Lothian for work purposes (which is expected to increase over the next 10-15 years) such that the loss of short

term accommodation is likely to have a significant negative impact on the local tourist economy in monetary and reputational terms. Therefore, the Council's Economic Development Service Manger supports this planning application stating that the change of use of the flat to short term holiday let accommodation supports the strategic goals and objectives of the Economic Development Strategy 2012-2022 and the intent and outcomes of part e) of Policy 30 of NPF4".

Further information that underlines the importance of tourism is included in the Planning Statement, and was submitted with the planning application.

For these reasons, the proposal complies with part e) ii of Policy 30 of NPF4

Conclusion

For all the above reasons, the proposal is in accordance with the development plan, NPF4 and the LDP, and complies with all relevant policies therein.

It is hoped, therefore, that this application will be supported by councillors in due course, and planning permission will be granted.

DECISION TYPE: Application Refused

REPORT OF HANDLING

PROPOSAL

The property to which this application relates is a top floor flat within a two and a half storey flatted building situated on the north side of, and at the western end of, New Street in Musselburgh. The flatted building is located within a predominantly residential area as defined by Policy RCA1 of the adopted East Lothian Local Development Plan 2018.

The flatted building is bounded to the north by a public car park with the Promenade and Fisherrow Sands beyond, to the east and west by neighbouring residential properties and to the south by a public car park.

Planning permission is retrospectively sought for the change of use of the residential top floor flat of Flat 4, 133 New Street, Musselburgh as a three-bedroom unit of short term self-catering holiday let accommodation.

No alterations have been undertaken to the flat, either internally or externally, to facilitate the retrospective change of use.

Subsequent to the registration of this application the applicant's agent has confirmed in writing that (i) the flat has been marketed/used for short term since 2022; (ii) the minimum length of stay is 3 night with the most common length of stay is between 3 or 4 night stays with the most being 8 nights thus far; (iii) the maximum number of visitors in one booking is 6 guests; (iv) recycling and/or bins are emptied every week by cleaners which in turn dispose of waste in the communal bin store; (v) the property is advertised online and is managed privately by the applicant; (vi) there is a key box provided for guests to collect and drop off keys.

There are 6 flats within the building (3 flats per floor) and the applicant's flat, the subject of this retrospective planning application, is accessed via a shared front entrance door, a shared hallway, and a communal stairwell. The block of flats is served by a communal parking area.

DEVELOPMENT PLAN

Section 25 of the Town and Country Planning (Scotland) Act 1997 requires that the application be determined in accordance with the development plan, unless material considerations indicate otherwise.

The development plan is National Planning Framework 4 (NPF4) and the adopted East Lothian Local Development Plan 2018.

Policies 13 (Sustainable transport) and 30 (Tourism) of NPF4 are relevant to the determination of this application. Policies RCA1 (Residential Character and Amenity), T1 (Development Location and Accessibility) and T2 (General Transport Impact) of the adopted East Lothian Local Development Plan 2018 are relevant to the determination of this application.

REPRESENTATION

Nine objections to this application have been received. The main grounds of objection are:

- (i) number of strangers using the communal stairwell with an increase in noise into late hours with concerns raised over comings and goings as a result of this intensity with cleaners with some occasions where the main access is left open by short term occupants.
- (ii) experiences of people stood outside drinking and smoking and being generally loud.
- (iii) block of 133 is not suitable for STLs with five of six flats occupied by elderly and middle-aged permanent residents and is disruptive to permanent residents.
- (iv) noise in the stairwell is a problem holiday comers do not live between the regular hours of permanent residents.
- (v) owner lives away and is concerned with income.
- (vi) security is a major problem with the key to the flat being the same as the key to the communal stair with the key box located on a wooden fence accessible by the public -24/7 access
- (vii) holiday let residents are not aware of the council's rubbish disposal or recycling policy and do not dispose of waste effectively or properly.
- (viii) Increased number of self-catered accommodations which means no knowing stranger from neighbour.

- (ix) Instances where fights have broken out in car park and general noise nuisance from banging on doors at night.
- (x) Suspicious nightly activity from men.
- (xi) Arrival/departures can sometimes be during anti-social hours with associated noise.
- (xii) Left previous flat due to STL as community was destroyed where does this stop.
- (xiii) Already two STLs in No.139 which has resulted in ASB issues which has involved the police.
- (xiv) Detrimental impact on health.

COMMUNITY COUNCIL COMMENTS

None.

PLANNING ASSESSMENT

This application seeks retrospective planning permission for the change of use of a three-bedroom top floor flat to a three-bedroom unit of holiday let accommodation. The holiday let comprises of three bedrooms, a bathroom, and a large open plan living/kitchen area. The applicant's flat can accommodating/sleep 6 people.

The East Lothian Economic Development Strategy 2012-22 identifies tourism as one of the strengths of the East Lothian economy and a source of employment opportunities in the future and the adopted East Lothian Local Development Plan 2018 states that a range of hotel, guest house and other accommodation attracts visitors and encourages them to stay and benefit the economy of East Lothian. The adopted East Lothian Local Development Plan 2018 states that all leisure and tourism related development proposals, including visitor attractions, hotels and holiday accommodation, will be assessed against all relevant Local Development Plan policies.

The change of use of the residential flat to a holiday let provides holiday accommodation within Musselburgh that attracts visitors and encourages them to stay in East Lothian, which supports the existing long-established business and benefits the wider economy of East Lothian.

The adopted East Lothian Local Development Plan 2018 does not contain a specific policy on the change of use of flats to holiday lets. However, part e) of Policy 30 (Tourism) of NPF4 states that:

Development proposals for the reuse of existing buildings for short term holiday letting will not be supported where the proposal will result in:

(i) An unacceptable impact on local amenity or the character of a neighbourhood or area; or (ii) The loss of residential accommodation where such loss is not outweighed by demonstrable local economic benefits.

Policy RCA1 (Residential Character and Amenity) of the adopted East Lothian Local Development Plan 2018 states that the predominantly residential character and amenity of existing or proposed housing areas will be safeguarded from the adverse impacts of uses other than housing. Development incompatible with the residential character and amenity of an area will not be permitted.

In the determination of this application, it is necessary to assess the impact of the change of use on the amenity of the existing residential properties contained within the residential flatted building to which the applicant's flat forms a part.

The Council's Senior Environmental Health Officer advises that whilst the normal use of a property would not result in loss of amenity to neighbours, the use of properties for short term holiday lets can result in future guests misusing and abusing the property in a manner that is antisocial and can result in a significant impact upon amenity of neighbours. However, it is stated that the Council's Environmental Health Service cannot assume that antisocial behaviour issues will arise and thus cannot impose any enforceable conditions to protect the amenity of neighbours.

The Council's Antisocial Behaviour Team advise that whilst there are no known ASB issues at the application site, there are cases along New Road and near the property. However, they advise that there are no records of any incidents relating to any antisocial behaviour matters at this address and thus they raise no objection to this retrospective planning application.

Police Scotland advise that there have been no police incidents at this address (having checked their records from 2020 onwards) and thus they raise no objection to this retrospective planning application.

The Council's Road Services raise no objection to this retrospective application and note that the supporting statement submitted with this application confirms that no internal changes are proposed. They state that whilst there may be some increase in the number of vehicles during the peak tourist season compared to residential use, this increase is likely to even out throughout the year resulting in no noticeable difference in overall car parking demand. Accordingly, the proposals do not conflict with Policy 13 of NPF4 or with Policies T1 and T2 of the adopted East Lothian Local Development Plan 2018.

The applicant's property is a three-bedroom flat located at second floor level within the two-storey residential flatted building of 133 New Street which contains a total of 6 residential properties (3 flats per floor). The property the subject of this retrospective application shares a communal stair and entrance with five other residential properties within the flatted building. The existing hallway serving the applicant's second floor flat also serves two other top floor flats within the building.

The use of the application property as a holiday let enables it to be let out for short stays resulting in a turnover of people over short time periods with a significant proportion of occupants likely to be visitors. Such a regular turnover of users/occupants would change the nature of comings and goings not only to the application property itself but also within the communal entrances, internal stair, and hallway of the residential building. Most users/occupants of the holiday let would have a degree of luggage or other property to take through the communal entrances, stair and hallway which would lead to a level of disturbance and nuisance not associated with the permanent/long term residential use of the property. This is harmful to the amenity of the occupants of the residential properties within the residential flatted building of 133 New Street, Musselburgh. It is accepted that permanent residents may also make noise, but there would be a tendency to retain their luggage in their homes and do not move them with the same frequency as regularly changing guests who arrive and depart sometimes at unsociable hours, and this differs from typical residential circumstances.

Along with the extra comings and goings of users of the holiday let at check in/check out there is also an additional level of activity not only at the application property but also within the communal entrances, stair and hallway as a result of people regularly accessing both the main building of 133 New Street and the application property itself to service/clean it and remove waste and recycling material after each guests stay. This level of additional activity is evidently different to that expected with the permanent/long term use of the flat as a private residence again which is harmful to the amenity of the occupants of the residential properties within the residential flatted building of 133 New Street, Musselburgh.

Moreover, allowing frequently changing guests unfettered access to otherwise secure shared areas changes the actual and perceived level of security for the existing permanent residents. Whilst the permanent residents are likely to have visitors of their own from time to time, those permanent residents would remain in control of security to communal areas. The introduction of frequently changing guests regularly into these secure areas, independent of the owner, would therefore differ from typical residential circumstances.

Given the specific circumstances and location of the application property within the residential building of 133 New Street, Musselburgh which contains a number of permanent/long term residences and which shares a communal front and rear entrance, stair and hallway, the retrospective change of use of the applicant's third floor flat as a three bedroom unit of short term self-catering holiday let accommodation is incompatible with and harmful to the amenity of the occupiers of the residential properties within the residential building of 133 New Street, Musselburgh. By having an unacceptable impact on local amenity, the proposal is contrary to part e) of Policy 30 of NPF4 and with Policy RCA1 of the adopted East Lothian Local Development Plan 2018.

It is now necessary to assess the impact of the change of use on the loss of residential accommodation where such loss is not outweighed by demonstrable local economic benefits as is stated in part e) of Policy 30 of NPF4.

The Council's Housing Strategy & Development Service state that the change in use of this property from a long term residential dwelling to a short term let is considered a significant loss because (i) Musselburgh is part of a constrained housing system and the housing need outstrips the supply; (ii) there is an existing concentration of short term lets within the area; and (iii) the property is not an established short term let. Accordingly, the Council's Housing Strategy & Development Service object to this retrospective planning application.

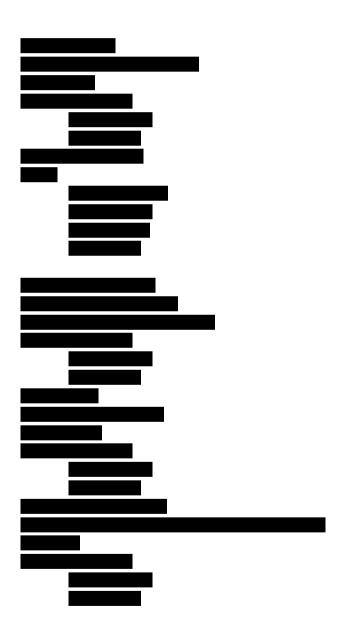

The applicant further submitted evidence of a GVA study on the benefit of STL in Edinburgh – whilst this does not apply to Musselburgh, indeed a historic part of Edinburgh, it would be reasonable to assume that its findings may be applied to Musselburgh. Nevertheless, and notwithstanding this, the Housing Strategy and Development Service believes that whilst acknowledging the economic benefit it may bring, this would not outweigh the loss of a permanent residential address and as such object on this ground also.

Noting that the proposed is seeking consent retrospectively, the application property of Flat 4, 133 New Street, Musselburgh as a holiday let is unauthorised and a breach of planning control. Enforcement action will be taken to ensure the cessation of the holiday let use with the period for compliance with the enforcement notice being three months.

REASON FOR REFUSAL:

The holiday let use of the flatted property is incompatible with and harmful to the amenity of the occupants of other flatted properties used as residential dwellings within the residential building of 133 New Street and as such is contrary to part e) of Policy 30 of National Planning Framework 4 and Policy RCA1 of the adopted East Lothian Local Development Plan 2018.

EAST LOTHIAN COUNCIL DECISION NOTICE

TOWN AND COUNTRY PLANNING (SCOTLAND) ACT 1997 TOWN AND COUNTRY PLANNING (DEVELOPMENT MANAGEMENT PROCEDURE) (SCOTLAND) REGULATIONS 2013

Ms Ruth Shiraz c/o Houghton Planning Ltd Per Paul Houghton MRTPI Alloa Business Centre Whins Road Alloa Clacks FK10 3RF

APPLICANT: Ms Ruth Shiraz

With reference to your application registered on 10th August 2023 for planning permission under the above mentioned Acts and Regulations for the following development, viz:-

Change of use of flat to short term holiday let (Retrospective)

at Flat 4 133 New Street Musselburgh East Lothian

East Lothian Council as the Planning Authority in exercise of their powers under the abovementioned Acts and Regulations hereby **REFUSE PLANNING PERMISSION** for the said development.

The reasons for the Council's refusal of planning permission are:-

The holiday let use of the flatted property is incompatible with and harmful to the amenity of the occupants of other flatted properties used as residential dwellings within the residential building of 133 New Street and as such is contrary to part e) of Policy 30 of National Planning Framework 4 and Policy RCA1 of the adopted East Lothian Local Development Plan 2018.

The report on this application is attached to this Decision Notice and its terms shall be deemed to be incorporated in full in this Decision Notice.

Details of the following are given in the application report:

- the terms on which the Planning Authority based this decision;
- details of any variations made to the application in terms of Section 32A of the Town and Country Planning (Scotland) Act 1997.

The plans to which this decision relate are as follows:

Keith Dingwall Service Manager - Planning

NOTES

If the applicant is aggrieved by the decision to refuse permission for the proposed development, the applicant may require the planning authority to review the case under section 43A of the Town and Country Planning (Scotland) Act 1997 within three months from the date of this notice. The notice of review should be addressed to the Clerk to the Local Review Body, Committee Team, Communications and Democratic Services, John Muir House, Haddington, East Lothian EH41 3HA.

If permission to develop land is refused or granted subject to conditions and the owner of the land claims that the land has become incapable of reasonably beneficial use in its existing state and cannot be rendered capable of reasonably beneficial use by the carrying out of any development which has been or would be permitted, the owner of the land may serve on the Planning Authority a purchase notice requiring the purchase of the owner of the land's interest in the land in accordance with Part 5 of the Town and Country Planning (Scotland) Act 1997.

John Muir House Haddington EH41 3HA Tel: 01620 827 216 Email: planning@eastlothian.gov.uk

Planning Statement Flat 4, 133 New Street, Musselburgh, EH21 6DH

Introduction

Houghton Planning Ltd have been instructed by Ruth Shiraz to submit a planning application for "Change of use of flat to short term holiday let and flat (Retrospective)" at Flat 4, 133 New Street, Musselburgh, EH21 6DH.

Ms Shiraz has owned the property since September 2022, and has used the property for short term letting purposes since then.

Site Description

Number 133 New Street, shown below, is a block of apartments that is situated towards the western end, and on the south side, of New Street overlooking the beach and harbour in Musselburgh.

Flat 4 on the second (top) floor is an 84sqm property comprising an open plan living/dining area, kitchen, and three bedrooms. All of which are served by a bathroom. Photographs are included with the application. A floorplan of the property is also included.

There is a secure resident's car park located under the building, with access from the front of the property, as well as visitor parking to the front. There are 42 shared spaces

for visitors outside the apartment complex in total, which are rarely all filled. There are usually at least 15-20 free spaces (often more). In the time the applicant has owned the apartment, parking has never been an issue for visitors, or guests.

Specific Guest Rules

House rules include the following:

- Guests are vetted, as far as possible, by checking previous stays information online, and asking guests to provide, in confidence, some information on themselves, and the purpose of their visit.
- The applicant does not allow any single sex groups, nor any groups where guests all are under 25. There is a six guest limit and, whilst children are permitted, there is a no pets policy.
- Absolutely no parties, or events of any kind, are permitted.
- Guests are requested to be guiet after 11pm.
- There is a no smoking policy within the property.
- Check-in times are between 3 pm and 11 pm, and the applicant does not allow any arrivals after 11 pm. Guests must check out by 10am, but are asked not to leave before 8am unless absolutely necessary.

Relations with neighbours

The applicant has had no direct complaints from any neighbours about anti-social behaviour, and does everything possible to maintain good relations.

Planning Assessment

The planning application is seeking the change of use of the property to allow its continued use for short term holiday lets and as a flat. The reason for this is to allow the current short term letting to continue, but to allow the property to revert to a flat, if required in the future, without the need for a further planning permission.

The development plan is the adopted National Planning Framework 4 (NPF4), and the adopted East Lothian Local Development Plan 2018 (LDP).

The most relevant policies in NPF4 are Policy 13 (Sustainable transport) and Policy 30 (Tourism).

Review of recent planning applications in East Lothian suggests that the following LDP policies are usually considered relevant: Policy RCA 1 (Residential Character and Amenity), Policy T1 (Development Location and Accessibility) and Policy T2 (General Transport Impact).

The East Lothian Economic Development Strategy 2012-22 is also often mentioned, which identifies tourism as one of the strengths of the East Lothian economy, and a

source of employment opportunities for the local area. This finds its expression in the LDP whereby the Plan supports East Lothian having a range of hotel, guest house, and other tourist accommodation, which can attract visitors, and encourage them to stay, and benefit, the economy of East Lothian.

Dealing with NPF4 policy first, Policy 30e) states that: "Development proposals for the reuse of existing buildings for short term holiday letting will not be supported where the proposal will result in:

i. An unacceptable impact on local amenity or the character of a neighbourhood or area; or

ii. The loss of residential accommodation where such loss is not outweighed by demonstrable local economic benefits."

Policy RCA1 (Residential Character and Amenity) in the LDP, in effect, covers the same ground as Policy 30 e) i, and states that development incompatible with the residential character and amenity of an area will not be permitted.

In terms of National Planning Framework Policy 30 e) i, the applicant is unaware of any noise related, or any other anti-social issues, having arisen from the use of the property as a short term let. This is partly a reflection of the site context, and layout of the property itself, and partly the type of guests it attracts, and also the way it is managed.

The applicant is aware of some of the issues planning officers have raised with other properties, and can comment as follows:

- Turnover of guests Unlike many short term lets, the turnover of guests is relatively infrequent at this property. People tend to stay in the property for at least a week, and often for much longer periods. Therefore, neighbours do not experience an obvious increase in comings and goings to the property, as against what they would experience with owner occupation, or a tenant. Also, what comings and goings there are tend to be during the day, with any changeover, and cleaning, of the property being during working hours. Although guests can arrive up to 11pm, this is exceedingly rare, and most arrive in the afternoon, and leave mid-morning.
- Luggage Most people using the property come with a rucksack, or with a small suitcase. Because of the vetting that goes on, and because most guests are seasoned holidaymakers, they are conscious that they need to be quiet using communal areas, and not to make noise by trying to drag their cases up the stairs rather than carrying them.
- Overall visits to the property It is often stated that with guest turnover, and cleaners visiting a property, that the number of comings and goings per day from a short term let are higher than that for a flat that is owner occupied, or tenanted. That is actually not borne out by the reality, which is that many flats

of this size could have a number of young professionals living in them as tenants who all leave the flat, and return, at different times, and may also have cleaners, delivery drivers, friends, and relatives, visiting them at all sorts of times day and night. The overall effect is that there is little noticeable difference between the use of the flat as a short term let, and what could happen if the applicant put in tenants, which is what would happen here if short term letting is not permitted to continue.

It is also worth noting that the absence of complaints in relation to this property is the norm in East Lothian, with the Council stating in its report in 2022 in relation to the possibility of a Control Area being introduced in all, of parts of, East Lothian that:

"there is little evidence at the moment to show that short term let properties are causing these problems, or that the issue is significant enough for a complaint to be made. Between the 1st January 2018 and October 2021, there were only two complaints received by East Lothian Council relating to Short Term Let (AirBnB) properties. This shows an overall low level of antisocial behaviour problems associated with these properties."

For these reasons, the proposal complies with Policy 30 e) i, and also complies with LDP Policy RCA 1.

In terms of Policy 30 e) ii, the same Council consultation in 2022 included some information on the number of short term lets in individual towns. For Musselburgh, the report stated that in 2022 the town had a total of 12,639 dwellings, including flats, 43 of which were being used as short term lets, which is 0.3% of the total. In the town centre, the respective figures were 819 properties, of which 7 were short term lets, or 0.85%. The town-wide percentage for Musselburgh was stated as being lower than that for Dunbar, North Berwick, and Haddington, although on a par with Gullane. The town centre percentage was lower than all these towns, and significantly lower than for North Berwick and Gullane. More significantly, the percentages for Musselburgh (whole town and town centre only) are lower than the national average of 1.2% (Scottish Government 2019 - Research into the impact of short-term lets on communities across Scotland).

Against that background, the loss of this one flat to the housing supply for the time it is a short term let is negligible. Even then, Policy 30 e) ii requires that this issue is weighed against the economic benefits of short term lets of which there are many.

In a recent Report of Handling for a planning application for a short term let in Musselburgh, the case officer quoted the following figures.

- The tourism sector contributed £155m to the local economy in 2021.
- The tourism sector supported 10% of the workforce.

More up-to-date figures for the Lothians can be found in a report produced for the Association of Scotland's Self Caterers, and the Professional Association of Self-Caterers, by Frontline Consultants, and it is also worthwhile considering the VisitScotland factsheet for Edinburgh and the Lothians, both of which are being submitted with the planning application. Both documents underline the significant contribution that tourism plays to the Lothians' economy, and how many jobs it supports.

At the micro-level, recent work undertaken for City of Edinburgh Council suggests that a short term let generates close to £20,000 net annual GVA, and supports just under one FTE job. Much of the spend happens locally, and so a short term let will help the local area by supporting shops, restaurants, and tourist attractions.

For these reasons, the current proposal is considered by comply with NPF4 Policy e) ii.

That just leaves the issue of sustainable transport, and general transport impact. In terms of those, the property is close to the town centre, and so anyone staying there has access to public transport, and walking, and cycling, networks. The applicant makes information available to guests encouraging them to use these methods of transport both to arrive at the property, and for any excursions. If guests do arrive by car, the property has plenty of available parking for them to the front and rear.

For the above reasons, the proposal complies with NPF4 policy 13, and LDP policies T1 and T2.

Conclusion

For all the above reasons, the proposal is in accordance with the development plan, NPF4 and the LDP, and complies with Policies 13 and 30 in NPF4, and Policies RCA1, T1 and T2 in the LDP.

It is hoped, therefore, that this application will secure a favourable recommendation in due course, and planning permission will be granted.

Short Term Lets Engagement Exercise East Lothian Planning Service February 2022

Background

This Engagement Exercise is being undertaken to gather the views of East Lothian residents on the issue of short-term lets and their impact, positive or negative, on East Lothian's communities.

The reason for engaging in this process at present is due to the Scottish Government introducing legislation that allows Local Authorities to create control areas if there is a particular prevalence of short term lets and it deemed that this is creating undesirable impacts on the local community. Planning legislation allows planning authorities to designate all of their area as a control area or parts of their area as one or more control areas. They are not under a duty to designate control areas and may choose not to do so. If control areas are introduced then within these areas short terms lets would require planning permission and their numbers could be restricted.

This note sets out background information on the issue of short term lets, what they are, their prevalence in the main East Lothian settlements and the types of issues that should be considered when considering the need for control areas.

The Scottish Government has released a Guidance document titled Circular 2/2021 which sets out the types of issues that would be relevant to determining if short terms lets control areas are required. It states they could be brought in:

- to help manage high concentrations of secondary letting (where it affects the availability of residential housing or the character of a neighbourhood);
- to restrict or prevent short-term lets in places or types of building where it is not appropriate; or
- to help local authorities ensure that homes are used to best effect in their areas.

Control areas are a land use planning tool and if these controls are introduced, then it is essential that it is due to relevant planning issues being regularly raised as a problem by residents. Within the context of the three issues set out above, relevant planning considerations would include:

- Changes to the look and feel of a neighbourhood, such as multiple keyboxes on many buildings or structures or wheelie suitcase noise on streets and in stairwells.
- Signs that local services are struggling, such as many instances of overflowing bins.
- Lack of affordable and appropriate housing for local residents, perhaps indicated by a high share of sale volumes to, and high prices paid by, non-residents.
- A significantly higher level of complaints relevant to use of dwellinghouses as short-term lets from neighbours spread across a number of tenements or properties than in a comparable area, within or outside the planning authority area.
- Detrimental impact on local amenity, with some businesses, schools or

other services that serve, and are reliant on, permanent residents closing or relocating.

Ultimately, it will be for the Council to determine whether a control area is required taking all relevant local circumstances into account. Prior to making this decision, we are seeking the views of local residents and organisations as to whether they think any of the issues and planning considerations set out above are prevalent in East Lothian and whether this would merit the introduction of control areas. These views are being gathered through an online survey on the East Lothian Consultation Hub.

This note provides further information on the planning issues relevant to short terms lets and will assist in the completion of an accompanying survey on the East Lothian Consultation Hub. This survey seeks to gather the views of the public and other interested parties on Short Term Letting in East Lothian. The survey is open from the 3rd February 2022 until the 17th March 2022, at which point the views provided will help shape a recommended position on whether short term let control areas are a good idea in East Lothian.

What is a Short Term Let?

Short term lets are letting arrangements are those that cater for peoples circumstances where they do not require accommodation for a long period and are normally aimed at the tourist market and workers with very short temporary contracts. The definition covers properties that are either whole houses or flats and are defined within Regulation 2 of the Control Area Regulations 2021 as:

- 2.—(1) For the purposes of section 26B of the Act, and subject to section 26B(3) of the Act, a short-term let is provided where all of the following criteria are met—
- (a) sleeping accommodation is provided to one or more persons for one or more nights for commercial consideration,
- (b) no person to whom sleeping accommodation is provided is an immediate family member of the person by whom the accommodation is being provided,
- (c) the accommodation is not provided for the principal purpose of facilitating the provision of work or services to the person by whom the accommodation is being provided or to another member of that person's household,
- (d) the accommodation is not provided by an employer to an employee in terms of a contract of employment or for the better performance of the employee's duties, and (e) the accommodation is not excluded accommodation.

The types of properties excluded from the definition are as follows:

- private residential tenancies under section 1 of the Private Housing (Tenancies) Scotland Act 2016; and
- tenancies of a dwellinghouse or part of it where all or part of the dwelling house is the only or principal home of the landlord or occupier

What Are The Benefits of a Short Term Let?

The Short Term Letting sector has experienced growth in recent years and there are a number of reasons for this.

Tourism

The biggest positive effect of short term lets is on the tourism sector. The availability and choice of property types available as short term lets allows people to visit the area and stay in accommodation which suits their needs. Unlike many hotels and B&Bs or guest houses which are typically located in town or city centres, properties available for Short Term Lets tend to offer greater choice of location. Depending on the type of property, they can also offer certain facilities that hotels may not be able to provide, such as exclusive use of a whole house or flat, access to kitchens and food preparation areas, laundry, gardens etc. This allows families, couples, or groups of friends the ability to all stay in the same location and share facilities. This opens up tourism to a wider part of the population who may otherwise not be able to visit the area.

Additional income for local residents

Existing home owners can, subject to any mortgage restrictions, let out part of their property on platforms such as AirBnB providing them with an additional source of income. This can be very useful both for the property owner and also for the tenant. Property owners may find themselves in circumstances that they did not anticipate when buying the property, such as employment changes, family breakups etc. These situations can create problems for being able to afford mortgage payments and therefore risks owners being forced to sell and find a cheaper property. Short term letting can supplement people's income and potentially help them to remain in their home. For tenants, renting a room in a property means that living costs (such as Council tax, utilities etc.) can be shared rather than them the responsibility of the sole tenant which may be unaffordable. They also have the social benefits of living with someone else, which can be helpful if someone is new to the area.

<u>Seasonality</u>

Seasonality is an issue for Short Term Lets. For most areas in Scotland, there is generally a peak tourism season lasting roughly from April – September. Outside of this peak season, many properties can struggle to find occupiers. They can be left empty and unused for months at a time. With a greater choice of rental types available through the Short Term Let market, there is potential for extending the normal peak tourist season. Certain events held in East Lothian (Scottish Open golf, Scottish Half Marathon, Fringe by the Sea, 3 Harbours Arts Festival etc.) typically contribute to the use of short term let properties in the peak season, but may encourage people to visit again outside of these times if they have a positive experience in the area.

Additionally, with East Lothian's proximity to Edinburgh and excellent transport links into the city, Short Term Lets can take advantage of particular events held in the capital (such as the Fringe Festival, Hogmanay etc.) and others outside of the typical tourist season. The existence of short term lets in East Lothian helps to provide accommodation for those who do not wish (or cannot afford) to stay within the city itself but will be visiting it or attending an event.

The 2021 Regulations

The Scottish Government approved new legislation on the 24th February 2021 called the *Town and Country Planning (Short-term Let Control Areas) (Scotland) Regulations 2021*. These Regulations came into force on the 1st April 2021. They introduce new powers for Local Authorities to help them control and manage short term lettings within their areas. This is through both Licensing and Planning.

Prior to the approval of the new legislation, Local Authorities were invited to respond to consultation on the proposed new powers. A response was provided by East Lothian Council which broadly supported the principle of these new powers. To support the new legislation and provide further clarity on how the act will work in practice, the Scottish Government produced Planning Circular 1_21 Establishing A Short-Term Let Control Area. The Circular provides additional information on how planning applications will be determined, arrangements for how Local Authorities must consult with the public when proposing to establish a control area, and the links with licensing regimes.

What is a Control Area?

Under the new legislation, within a Control Area planning permission would always be required to operate a Short Term Let. When a property is originally used as a dwellinghouse, if it is to be used for Short Term Letting then planning permission for a change of use is required. Outside of Control Areas, planning permission is not required.

Control Areas can be designated for the whole of a county or they can be designated for parts of it. The legislation does not require Councils to designate Control Areas if they do not deem it necessary. The legislation simply introduces powers to designate where Councils have sufficient reasons.

The legislation also introduces a new Licensing Order. It means that all short term let properties are required to obtain a license to operate. This includes those not within any Control Area. Local Authorities, as the Licensing Authority, must establish a Licensing Regime to enable these new provisions to be implemented.

The Licensing Order introduces a number of mandatory conditions that will apply to all short term let licenses, if granted. Councils have the ability to add additional conditions to a license. It is therefore essential for Planning and Licensing Teams to work together and in collaboration with other Services in order to meet the requirements of the new act.

The Scottish Government has given Councils until the 1st October 2022 to establish a regime for Licensing. New operators of short term lets will not be able to take any bookings until they have applied for and been granted a license. Existing operators of short term lets (those operating before 1st October 2022) will have until the 1st April 2023 to apply for a license.

East Lothian Context

At the time of writing, there are 572 listings of Short Term Lets available in East Lothian. The vast majority of these are whole houses (87%), with the remainder being private rooms (e.g. within a flat which is part of a block usually also containing private residential dwellings). The properties are listed on AirBnB (www.airbnb.co.uk) with some also listed on VRBO (www.vrbo.com). Whilst listings exist on other websites or platforms, these are typically duplicate listings of those seen on AirBnB and VRBO. This paper therefore focusses on the listings within those two platforms.

The location of Short Term Let properties in East Lothian is generally concentrated in urban areas, with highest numbers in designated town centres and just beyond. Smaller clusters or sometimes single properties can be found in the smaller villages and hamlets of East Lothian's more rural areas.

The table below provides figures for the total number of Short Term Let properties in five of East Lothian's main towns. It also shows figures for the designated town centres, or local centres for smaller settlements. These are then shown as a percentage of total dwellings or dwellings within town or local centres.

	Dwellings (settlement)	Total STLs	% of STLs (settlement)	Dwellings (TC/LC)	Total STLs in TC/LC	% of STLs (TC/LC)
Dunbar	4,976	42	0.8%	485	18	3.7%
Musselburgh	12,639	43	0.3%	819	7	0.85%
North Berwick	4,261	153	3.59%	315	50	16%
Haddington	5,477	20	0.37%	496	6	1.2%
Gullane	1,533	45	2.94%	80	12	15%

The figures provide here are approximate due to the information available on the exact location of AirBnB properties only being available once a booking is confirmed by the owner/operator. Therefore these figures are only to be used as a guide.

Why is the Legislation required?

Prior to this new legislation, the need to apply for planning permission to operate a Short Term Let was for Councils to decide on a case by case basis. This meant that many

properties could and were being used for this purpose without the need for any planning consent, or any planning controls such as conditions.

Therefore Local Authorities had little control over where and how many properties were used for Short Tem Letting purposes. Councils were also only able to exercise control through Police Scotland (where a crime had or was suspected of having been committed) or through Safer Communities Service where there were concerns or complaints raised regarding issues such as noise or antisocial behaviour.

The Scottish Government wanted to provide Local Authorities with the opportunity to have more control over Short Term Lets in their respective areas, in order to help to manage both the effects on local housing needs and stock, and the effects associated with amenity and antisocial behaviour. Whilst the majority of Short Term Lettings operate without any issues, there can be instances where properties are causing problems for neighbouring residents (e.g. noise caused by occupants) or through environmental issues such as excess rubbish.

As well as the environmental issues there are a range of other factors that could be relevant in determining whether any planning controls over short term lets are required. The Circular sets out the issues that would form material planning considerations when assessing an application for planning permission for a short term let. These are detailed below with some local East Lothian context provided where possible.

Changes to the look and feel of a neighbourhood

Under this issue, the Circular gives examples such as keyboxes appearing on multiple buildings, or frequent noise from suitcases being wheeled along pavements or streets.

The most likely location where these issues would be more prevalent are town centres as these typically contain the highest numbers of Short Term Let properties.

The character of an urban area can be gradually changed if for example there are too many external additions to buildings such as keyboxes, signage either attached to a building or within the curtilage, or even through increases in the number of vehicles parked outside buildings.

Another potential issue, although this is not specifically related to Short Term Lets, is for buildings to be maintained to a high standard externally. Repainting of buildings and appropriate management and care for stone or brickwork is important for retaining the character of an area.

Determining whether short term lets are impacting upon the look and feel of an area is something that will need to be monitored over time, and also on each individual planning application for change of use to a short term let. In particular, sensitive locations such as conservation areas will need to be closely monitored.

Although more difficult to quantify, changes to the look and feel of a neighbourhood can be more subtle, but for existing (permanent or long term) residents, they can be just as

damaging. Whilst it is not considered to be a significant issue in East Lothian at the moment, the existence of too many short term let properties can affect neighbourhoods through reducing social cohesion. There could be a decline over time in permanent residents who previously knew each other leaving some feeling more isolated. It is possible that a previously quiet neighbourhood could become noisier particularly at night through more frequent movement of people. All these issues can impact upon how safe people feel in their neighbourhood, can make people feel more uncomfortable, or less inclusive.

Again, this will need to be monitored over time and the Council will be seeking people's views on these matters through the dedicated Short Term Lets public consultation. The annual residents' survey could also provide some additional information depending on responses.

Struggling services (e.g. waste and overflowing bins)

There is some evidence at the national level that, in some areas, short term let properties tend to experience issues related to excess rubbish. This can either be related to the hosts not managing their property appropriately, or through the behaviour of guests. The issue may not be directly outside the property but could be seen in the wider street or neighbourhood where for example bins fill up very quickly and start to overflow.

The consultation on Short Term Lets give the opportunity for you to provide comments on any areas you feel are problematic at the moment. The Council will continue to liaise with our own Waste Collection Service regarding any areas that they become aware of such problems or changes over time.

Lack of affordable and appropriate housing for local residents

The existence of short term let properties can negatively impact upon the housing market. This is particularly the case in areas where, for example, affordable housing is limited both in terms of existing stock and in the amount of new stock programmed to be built. Short term let properties are often owned as a private individual's second property (such as a buy-to-let) or they are part of a commercial company's property portfolio where they own multiple properties for letting purposes.

Additionally, short term letting can impact upon the private rental sector. This is because it is often seen as more attractive (and profitable) to rent properties on a short term basis allowing higher rates to be charged and also allowing a wider potential customer base. It is also possible that landlords may decide to increase monthly rental costs on long term rentals if they frequently see short term lets at higher prices. Within the rental sector, a common tenure is a flat share where tenants have their own private bedroom but share other parts of the property (such as a kitchen, bathroom, and living room) with one or more people. This rental type is often very helpful for people who cannot afford to rent an entire flat or house by themselves. Again, it is possible that property owners may wish to offer their spare room/s as a short term let rather than a long term rental due to higher rates.

With home ownership increasingly difficult for people to attain due to rising costs of living and rising property prices, the existence of too many short term let properties in the county could further reduce people's ability to get on the property ladder.

As many of the properties available for short term let are flats, this means that potential buyers, especially first time buyers who may only be able to afford a town centre flat, are not able to purchase a property. People therefore may end up being forced to live in an area that they do not wish or that is not that suitable for their needs e.g. longer commute to place of work. Also, where short term lets exist in rural communities with small housing stocks, there may be an issue for rural economy if there are no properties available for small business owners for example.

Another issue with high numbers of short term lets is through Buy-to-Let. Again, many buy-to-let properties are second properties for the owners, offering properties to let at high prices. Second homes could cause issues for people hoping to secure their own home.

All these factors, together with the relatively small rental market in East Lothian, could potentially limit choice for people, either those wishing to move into the area or those wishing to move elsewhere within the county. Whilst the cost of property and whether it is owned by a local resident or by a professional company, is not a material planning consideration for assessing applications, the Council has a duty to ensure that there is a range of affordable properties available in the area. This is an issue that the current Local Development Plan 2018 and the forthcoming Local Development Plan 2 will address. This is one strategy, together with the Local Housing Strategy and also the draft Poverty Plan, which the Council will use to address these issues.

With specific reference to the new Short Term Let legislation and planning requirements, the Council will work closely with the Housing Strategy team to monitor changes over time, and help to inform decisions on whether control areas may be required. The online consultation provides an opportunity to provide comments on whether you believe short term lets are causing a problem for finding suitable affordable accommodation.

<u>Complaints</u>

Prior to the introduction of the new Short Term Let legislation, the use of the complaints system was one of the few methods of monitoring short term let properties. The nature of complaints is typically related to litter, noise and/or antisocial behaviour. The Planning Circular 1/21 stipulates that the number of complaints should be used when assessing applications for short term lets as a material consideration. This will require continued liaison with a number of ELC teams in order to obtain up to date information to inform decisions.

However, for East Lothian, there is little evidence at the moment to show that short term let properties are causing these problems, or that the issue is significant enough for a complaint to be made. Between the 1st January 2018 and October 2021, there were only two complaints received by East Lothian Council relating to Short Term Let (AirBnB)

properties. This shows an overall low level of antisocial behaviour problems associated with these properties.

Whilst it could be argued that there are more cases going unreported, and that the covid-19 pandemic has led to fewer complaints with tourism not operating for much of 2020 and 2021, the timeframe includes 2018 and 2019 when tourism was still at the normal prepandemic levels. This will continue to be monitored both in terms of overall numbers of complaints but also the location of the problems. Significant increases in complaints within a particular area could mean that intervention, in the form of a control area, is required.

The Licensing regime and planning process will allow greater control over how STLs operate, and should any complaints arise, then these can be dealt with through a joined-up approach.

<u>Local amenity (economy – e.g. businesses or other services closing/relocating where they rely on permanent residents in an area)</u>

The existence of Short Term Lets arguably helps to support the tourism sector both through the accommodation in which people stay but also through spending in the local area at shops, restaurants and tourist attractions.

There is however potential for short term lets, if they become too prevalent, to impact on local services in a negative way. Services that depend upon local people (or more permanent residents) such as libraries, solicitors etc. or those that rely upon regular and relatively fixed sales e.g. hair salons, pet shops etc. could experience significant reduction in profit if there are not enough local people living in an area that need them. These services are typically not going to be used by occupants of short term let properties, as they are (generally speaking) mostly used for tourism, business trips, or visiting family or friends. Services could therefore be forced to close and/or relocate. This in turn has a negative impact upon the local area, becoming less vibrant and also means that remaining residents have poorer access to services that they need.

As with any tourist accommodation, short term lets can easily be used by guests simply as a base, with travel for example into Edinburgh where spending occurs.

Many of the properties available for short term let provide guests with additional facilities not usually available at hotels, such as kitchens or food preparation areas. This could encourage greater use of self-catering and less spending on local cafes and restaurants.

It is therefore necessary to monitor over a longer period of time to see whether there is in fact a correlation between the increases in short term let properties in an area and the gradual loss of local businesses. It is expected that monitoring could be done through close working with the Economic Development and Tourism sectors of East Lothian Council. The online short term lets consultation seeks views on whether there have been changes to the level of services within given areas and the reasons for this to ascertain whether short term lets are having an impact.

Why we are consulting

East Lothian Council commissioned a study in 2019 to ascertain the impacts of Short Term Lets on the tourism sector. This was carried out by Avison Young and involved a survey sent out to various owners/operators of Short Term Let properties. Based on the results of the study, it was determined that the impacts of the new legislation on East Lothian's tourism sector would be minimal.

However, the study did not consider in depth the impacts of Short Term Lets on local housing, including home ownership and the private rental sector.

We are now conducting this public consultation inviting everyone from our communities to respond. The purpose of the consultation is to gather opinions and evidence to determine whether it is in the best interests of East Lothian and the public to designate any Control Areas or not. One of the most effective ways of gathering local information is to seek the views of the people who live in the communities and have direct day to day experience of living in the areas in which Short Term Let properties exist.

A number of Planning Authorities are already proposing to designate all or part of their areas as Control Areas. Should East Lothian Council determine that there is a need to establish one or more Control Areas, we will be required to prepare a Statement of Reasons for the designation, including a boundary. There would then be a public consultation on the proposed designation with opportunities for anyone to comment or object. More information on the designation process can be found in Planning Circular 1 21.

Proposed consultation arrangements

The Planning Service are running the public consultation for 8 weeks and this will involve an online survey published on the Consultation Hub between the 14th February and 11th April 2022. The availability of the consultation will be widely advertised on the East Lothian Council website, social media pages, newspaper notice, and also by direct email or letter notification to particular organisations or interested parties.

The survey is designed as a multiple choice response with an extra space per question for additional comments to be included by the respondent. Included with the consultation is an Information Sheet, similar to this Briefing Note, a copy of the Short-term let Control Area Regulations 2021, and a copy of Planning Circular 1_21: Establishing a Short-term Let Control Area. It is also proposed to include a map indicating concentrations of Short Term Lets in East Lothian. This is currently still in the development stage and will be confirmed nearer the time.

What will happen after the consultation?

Following the closing of the public consultation, we will analyse all the information gathered through the responses and a report will be taken to East Lothian Council detailing the findings. This will also provide recommendations as to the next steps. The findings will also help to inform the approach taken within the next Local Development Plan (LDP2).

1 **Executive Summary**

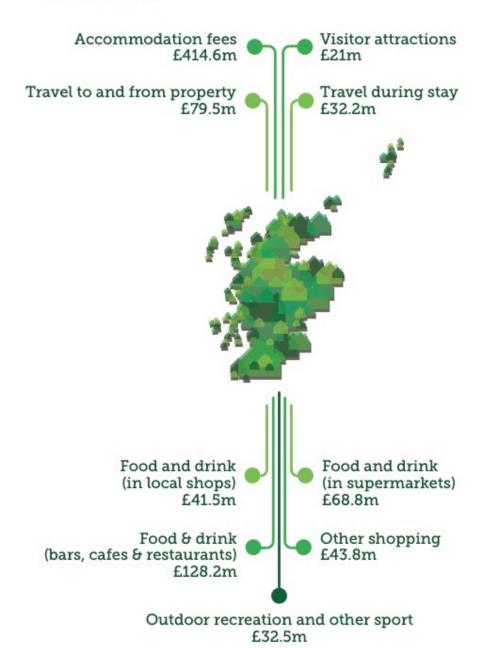

- 17,794 properties
- 2.4 million visitor nights per year
- £867.1 million total visitor spend
- Supports 23,979 FTE jobs
- £672.3 million Contribution to the Scottish economy

Areas with the greatest number of properties 1. Highland & Western Isles (5,580)

- 2. Dunbartonshire / Argyll & Bute (2,343)
- 3. Lothian (1,870)
- 4. Tayside (1,432)
- 5. Dumfries & Galloway (1,386)

Gross Visitor Spend by Item (Scotland)

2 Introduction

Since 2010 tourism has been the fastest growing sector in the UK in employment terms¹. By 2025, Britain aims to have a tourism industry worth over £257bn, supporting 3.8 million jobs. This is equivalent to almost 10% of UK GDP and around 11% of the total UK jobs².

The sector is predicted to grow at an annual rate of 3.8% through to 2025 – faster than the overall UK economy (with a predicted annual rate of 3% per annum) and much faster than sectors such as manufacturing, construction and retail³.

The Deloitte *Tourism: Jobs and Growth Report*⁴ found that the marginal revenue required to create a job in UK tourism is estimated to be around £54,000. For every 1% increase in total expenditure in UK tourism, it might be expected that full-time equivalent employment will increase by 0.9%.

Self-catering is an important component of the tourism industry. In order to fully understand its contribution, the Association of Scotland's Self-Caterers (ASSC) and the Professional Association of Self-Caterers UK (PASC UK) commissioned Frontline Consultants (Frontline) to carry out an independent Economic Impact Assessment of the self-catering industry in the UK. This includes an overall UK-wide report, providing headline findings for the UK and its four countries; plus detailed individual country reports for England, Scotland, Wales and Northern Ireland.

This report is for Scotland.

2.1 Research objectives

The objectives of the economic impact assessment were to:

- assess expenditure by property-owners and managers, and visitors in the local economy
- provide an independent, evidence-based, understanding of the direct and indirect economic impact/contribution of the self-catering sector in Scotland
- estimate the full-time equivalent jobs supported by the sector
- assess the impact of Covid-19 presenting feedback from 2019 and 2020

2.2 Methodology

The UK self-catering sector is diverse and made up of a number of small businesses. It is inherently difficult to gather a complete data set on the sector. In order to develop the economic model an 8-month data gathering exercise was undertaken to understand the number and make-up of self-catering properties across the UK.

The **number of self-catering properties** in each country was determined as follows:

- England and Wales VOA registrations
- Scotland NDR registrations
- Northern Ireland Local Authority registrations

3

¹ https://www.visitbritain.org/visitor-economy-facts

² https://www.visitbritain.org/visitor-economy-facts

³ https://www.visitbritain.org/visitor-economy-facts

⁴https://www.visitbritain.org/sites/default/files/vb-corporate/Documents-Library/documents/Tourism Jobs and Growth 2013.pdf

The **make-up of those self-catering properties** was based on a review of 1,000,724 transaction records provided to us by SuperControl to understand:

- property size
- occupancy levels for each property on each day of the year

The model includes over a million separate economic impact calculations, which were then reaggregated to produce as accurate as possible an estimate of the true economic impact of the sector.

This is a comprehensive approach that avoids any double counting and uses only verified data.

While these datasets are not 100% of the UK market, they are substantial, and provide the most comprehensive assessment of the sector to date. Findings therefore provide a conservative estimate of the scale of the self-catering sector.

3 Operators Survey

This section provides evidence from an e-survey of self-catering operators across Scotland. The survey was open from February-April 2021 and distributed by key partners.

3.1 Composition of the overall Scotland self-catering industry

Based on the information provided by NDR registrations and data provided by SuperControl, in 2020 there were 17,794 self-catering properties operating in Scotland. The majority of these were three bedroom or less properties. Table 2.1 provides a breakdown of these by region and number of bedrooms.

Table 2.1: Composition of the industry

		Total nu	mber of be	drooms		Total
Location	0-1	2	3	4	5+	Number of
						properties
Ayrshire	16%	50%	16%	10%	9%	840

(Source: ASSC⁵)

3.2 Sampling methodology and geographic locations

Self-catering properties across Scotland were invited to participate in the research. This was done by the various sponsor groups reaching out to operators, encouraging them to complete an e-survey.

The Steering Group and Frontline came together at various stages throughout the project to review the response rates, identifying which geographic areas were under-represented and those were targeted accordingly.

945 operators running a total of **2,173** properties across Scotland responded to the survey, giving a 99% confidence +/- 3% margin of error. This means that there is a 99% probability that the sample accurately reflects the wider population and is therefore representative of the self-catering sector in Scotland.

⁵ ASSC provided data on the total number of self-catering properties in Scotland based on units on non-domestic business rates (NDR). The breakdown by number of bedrooms is based on data provided by SuperControl

The geographic location of the surveyed self-catering operators was broadly representative of the sector as a whole with most regions having a minimum of 10% response rate with the exception of Glasgow City, Lothian and Renfrewshire.

Table 2.2: Location of surveyed self-catering operators

	Surveyed	operators	Total number of	Percentage of	
Location	Number of operators	Number of properties ⁶	properties across Scotland	properties consulted

Source: Frontline Self-Catering Operator Survey, 2021

3.3 Property summary

Operators ran or owned, on average, 2.3 properties. Properties owned, ranged from one to 60 with 60% owning just one.

Over two-thirds (71%) of properties have capacity for up to ten people.

Figure 2.1: Number of Guests

⁶ We only had a response from 329 operators on number of properties owned/run and have therefore used the average (2.3) and factored this up to total operators responding

3.4 Length of season and occupancy rates

In 2019 the majority of self-catering properties (93%, 2027) operated all year round. In 2020 this reduced, with only 75% (142) operating all year; this was due to Covid-19 lockdown restrictions.

Surveyed operators were asked what they considered to be their peak, high, mid and low seasons during a standard operating year. Generally their responses were:

- peak = July, August, Christmas and New Year
- high = May, June and September
- mid = April and October
- low = January, February, March, November and December

Operators were also asked to report their typical occupancy rates for the following:

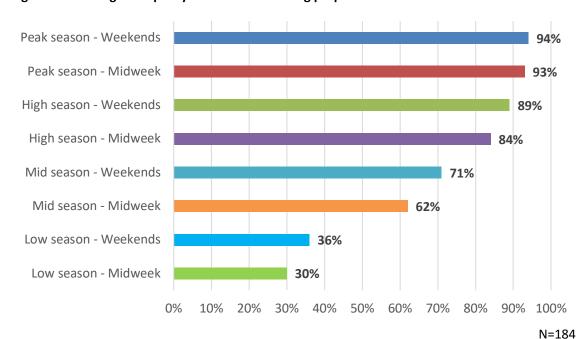

Figure 2.2: Average occupancy rates of self-catering properties

At peak, occupancy levels reached an average of 94% at the weekend and 93% midweek. During high season occupancy was 89% at the weekend and 84% during the week. Mid-season occupancy levels were 71% at the weekend and 62% mid-week with low season dropping to 36% at the weekend and 30% mid-week.

Operators were also asked about their average weekly occupancy level between 3 July and 30 September 2020 and the same period in 2019.

Table 2.4: Average weekly occupancy level between 3 July and 30 September (2019 and 2020)

	Under 10%		11-2	25%	26-	50%	51-	75%	76-9	90%	91% or	above
	2019	2020	2019	2020	2019	2020	2019	2020	2019	2020	2019	2020
Scotland	12%	1%	7%	1%	14%	3%	18%	9%	19%	25%	30%	61%
Scotianu	(23)	(2)	(13)	(2)	(26)	(5)	(34)	(16)	(37)	(44)	(58)	(110)

⁷ The response rate is lower for this question as many respondents opted for us to use the data held by SuperControl. AS1006-00 Scotland

The same was asked for the period of the 1 October and 30 November 2020 and 2019 as shown below.

Table 2.5: Average weekly occupancy level between 1 October and 30 November (2019 and 2020)

	Unde	r 10%	11-2	25%	26-	50%	51-7	75%	76-9	90%	91% or	above
	2019	2020	2019	2020	2019	2020	2019	2020	2019	2020	2019	2020
Scotland	38%	3%	17%	6%	23%	22%	10%	30%	7%	23%	6%	15%
Scotland	(72)	(6)	(32)	(11)	(44)	(40)	(19)	(54)	(13)	(41)	(11)	(26)

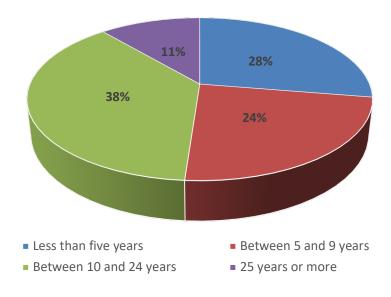

Occupancy levels provided by operators completing the survey were significantly higher than the occupancy levels derived from SuperControl data. The SuperControl data was based on 4,594 properties in Scotland and therefore this data was used to calculate the economic impact. Occupancy data from SuperControl can be seen in Appendix 1 and is more in line with general tourism occupancy figures.

92% (199) of operators had a minimal length of stay. This was, on average, 3.6 nights.

3.5 Property ownership and financial data

In just under half of cases, operators saw their self-catering properties as long-term investments, with 49% (317) of operators noting that they had owned and operated their properties for more than ten years.

Figure 2.3: Length of time survey participants have owned/operated their self-catering property

N=649

The vast majority of respondents (88%, 589) paid business rates for their properties.

Operators were asked to provide details of their turnover across 2017, 2018, 2019 and 2020. Table 2.6 shows the averages as well as total turnover across surveyed operators. This demonstrates that until 2020, average operator turnover was increasing (15% from 2017 through to 2019). **Not surprisingly the turnover drop in 2020 was significant, with a fall of 45% compared to 2019.**

Table 2.6: Operator turnover

	2017	2018	2019	2020
Number of respondents	204	224	253	256
Average turnover	£41,037	£43,379	£47,318	£26,114
Total turnover	£8,371,632	£9,716,897	£11,971,447	£6,685,061

When asked about their property portfolio, **80%** (259) said it remained the same during **2020** with a further 13% (43) saying it decreased and 7% (22) saying it increased. **During 2021, 77%** (250) **expect it to stay the same, 1**3% (4) expect it to decrease while 10% (32) expect it to increase.

3.6 Cancellation policy

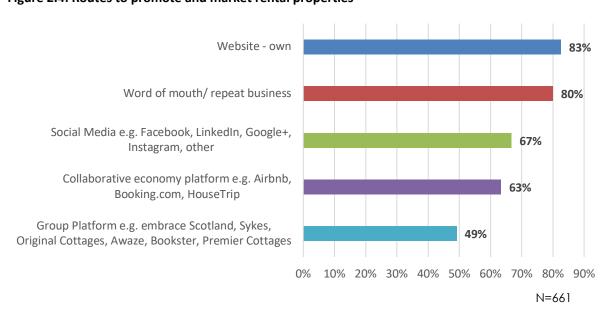

The majority (85%, 528) of operators stated that their cancellation policies became more flexible during Covid-19 with 12% (77) saying they stayed the same and just 3% (17) said their policy got stricter. Operators responded as follows about their cancellation policy:

- 38% (235) had bookings fully refundable up to a certain number of days prior to arrival
- 25% (155) provided a partial refund depending on how close to arrival they cancel
- 24% (151) had fully flexible bookings and would refund up to the day of arrival
- 7% (42) stated that anything paid by the guest at the point of cancellation is non-refundable
- 6% (37) had non-refundable bookings unless guests re-book the dates

3.7 Property promotion

Operators were asked how they promote and market their properties. Results are shown in Figure 2.4. Operators were asked to tick all that applied. **Website (83%)** and **word of mouth (80%)** were the most popular used methods of promotion.

Figure 2.4: Routes to promote and market rental properties

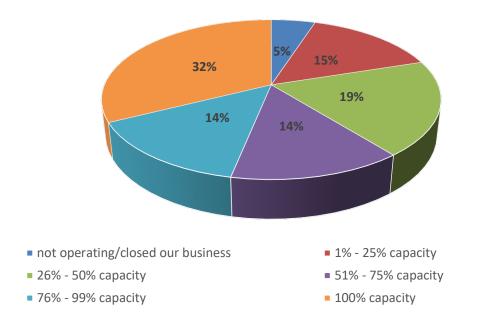

When looking at social media platforms in more detail, operators noted using the following:

- Facebook 95% (515)
- Instagram 52% (280)
- LinkedIn 13% (70)

3.8 Visitors and tourist season

Operators were asked what was the average capacity that their business was open during 2020 (this excludes periods of lockdown or when properties were in the highest tiers and could not open). Findings were as follows:

Figure 2.5: Average capacity during Covid-19

N=660

5% (33) were not operating at all while 32% (214) were at 100% capacity.

3.9 Accessibility, community integration and environment

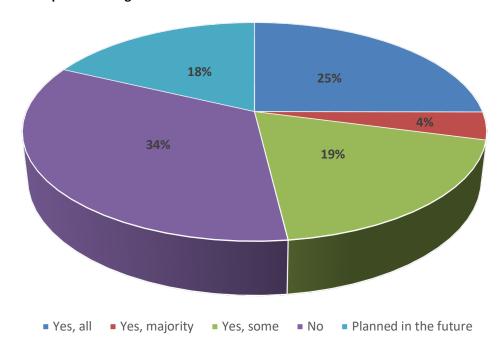

37% (202) of operators have properties that have accessibility features with a further 13% (27) planning for these in the future.

Some of the most common accessibility features included:

- no stairs or steps to enter (87%, 175)
- step-free path to entrance (79%, 169)
- wide entrance for guests (67%, 136)
- well-lit path to entrance (64%, 130)
- wide hallways (56%, 113)
- step-free shower (47%, 96)
- handheld shower head (42%, 85)

Operators were asked if their properties have green credentials. Just under half (48%, 259) said yes to some degree with a further 18% (95) planning for such credentials in the future.

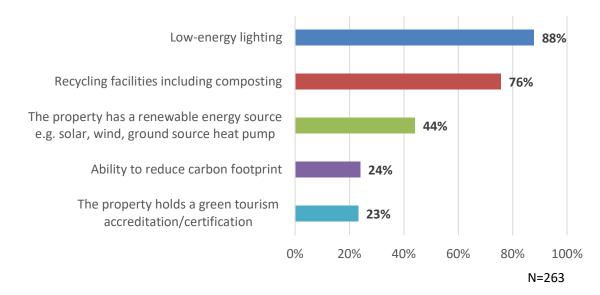

Figure 2.6: Properties with green credentials

N=537

Green credentials are highlighted in Figure 2.7. 88% of operators had low-energy lighting, 76% recycling facilities and 44% had a renewable energy source.

Figure 2.7: Green credentials held

Operators noted the following ways in which their business integrates with the local community.

100% 92% 90% 80% 80% 70% 60% 50% 40% 32% 26% 30% 20% 7% 10% 0% Use local suppliers Promote local In partnership Part of local Sell tickets for for local produce, with other local local events community community cleaning and activities providers initiative maintenance

Figure 2.8: Integration with local community

N=515

3.10 Staffing and expenditure

Surveyed operators were asked about staff numbers in part and full-time roles (Table 2.7). Results show that during high season operators employed, on average, 1.5 staff fulltime and 3.3 part time (paid staff). During low season, fulltime staff dropped to 0.6 while part time staff reduced to 2.2. Unpaid staff dropped from 2.1 fulltime in high season to 0.8 in low season. While part time went from 4.1 in high season to 6.7 in low season.

Table 2.7: Average number of staff in employment 2019

	High season				Low season				
		aid Dyment		npaid loyment		Paid loyment	Unpaid employment		
	Total	Avg. per operator	Total	Avg. per operato r	Total	Avg. per operator	Total	Avg. per operator	
Full time (35 hours per week or more)	163	1.5	269	2.1	55	0.6	83	0.8	
Part time (25-35 hours per week)	30	0.4	56	0.6	13	0.2	157	1.3	
Part time (15-25 hours per week)	38	0.4	75	0.8	33	0.5	296	1.5	
Part time (5-15 hours per week)	92	0.8	219	1.3	55	0.6	260	1.8	
Part time (0-5 hours per week)	164	1.7	213	1.4	82	0.9	82	2.1	

Surveyed operators were asked to provide details of their expenditure, for a range of areas in the last full financial year (2019) and then future expenditure in 2020. The total expenditure for each is presented in Tables 2.8 and 2.9. Findings show that current and or future spend is almost half of spend in 2019.

Table 2.8: Spend in 20198

	2019	9
	Total	Avg. per
	expenditure	operator
Wages and salaries (including cleaning staff)	£4,218,798	£13,293

 $^{^{\}rm 8}$ Reporting where the majority of the financial year was in 2019. $^{\rm 9}$ Reporting where the majority of the financial year was in 2020.

Per property, expenditure was £20,144 in 2019 reducing to £10,435 in 2020. This is based on operators owning, on average, 2.3 properties.

Grossing that spend up to the total population (17,794 self-catering properties across Scotland), operators spent a total of £358.4m in 2019 reducing to £185.7m in 2020. Table 2.10 shows grossed total expenditure.

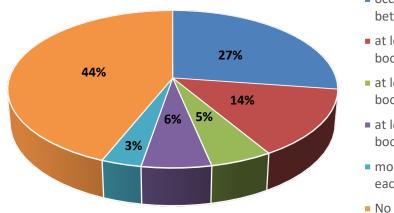

Table 2.10: Grossed current or future spend on each of the following

	201	L 9		2020			
Total expenditure	Avg. per operator	Avg. per property	Grossed to total population	Total expenditure	Avg. per operator	Avg. per property	Grossed to total population
£14,679,442	£46,332	£20,144	£358.4	£7,581,813	£24,000	£10,435	£185.7m

12% (49) of operators stated that they had taken on additional staff (full time or part-time) to assist with the government endorsed cleaning protocols and reopening guidelines. On average operators employed an additional 1.5 cleaning staff.

Furthermore, 87% (322) noted that cleaning costs increased as a result of Covid-19. Over half (56%) said that they were blocking days between bookings for additional cleaning as shown in Figure 2.9. Over one quarter (27%) said they occasionally blocked for cleaning, but not between every booking while 28% had between 1-3 days blocked for cleaning between each booking. 44% did not block for cleaning.

Figure 2.9: Additional cleaning days

- occasionally, but not between every booking
- at least 1 day between each booking
- at least 2 days between each booking
- at least 3 days between each booking
- more than 3 days between each booking

N=319

Thinking about now and in the future, operators were asked how much they have or will have invested in their properties last year, this year and next year. Table 2.11 summarises the investment.

Table 2.11: Operator investment

	Last financial year (2019/20)	This financial year (2020/21)	Next financial year (2021/22)
Less than £10k	61% (212)	81% (261)	85% (247)

£26k up to £50k	8% (28)	2% (8)	2% (5)
Over £51k	6% (22)	3% (11)	1.5% (4)

4 Visitors Survey

An online visitor survey was open from March - May 2021. The survey was disseminated widely by sponsors and stakeholders. **718 visitors completed the survey.** Table 3.1 shows the spread of visitors across the Scottish regions. Visitors were asked to tell us about a visit in 2020 i.e., during Covid-19 (Visit 1) and during 2019 (Visit 2).

Table 3.1: Location of holiday self-catering properties visited

4.1 Visitor origin and number of trips

The majority of survey participants lived in Scotland (60%) with 37% from England. 1% were from Wales and 0.1% from Northern Ireland. 2% came from outside the UK.

Table 3.2: Visitor home country

Location	Visitors
Scotland	60% (433)
England	37% (266)
Wales	1% (5)
Northern Ireland	0.1% (1)
Outside the UK ¹⁰	2% (13)

Source: Frontline Self-Catering Visitor Survey, 2021 N=718

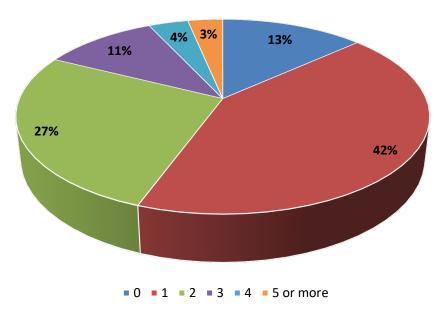

62

¹⁰ This is an underrepresentation of actual overseas numbers and is a result of difficulty in engaging this group to participate in the study.

AS1006-00 Scotland

13% of respondents had not stayed in a self-catering property in the UK during the last 12 months (up until November 2020) with a further 42% staying only once. 27% stayed twice.

Figure 3.1: Number of visits to self-catering properties in the past 12 months (up to and including November 2020)

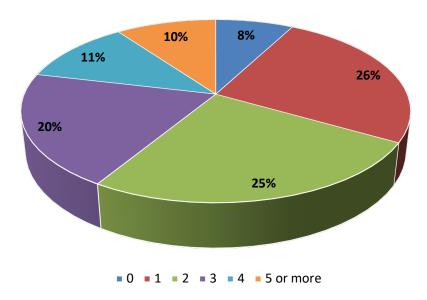

Source: Frontline Self-Catering Visitor Survey, 2021

N=705

Looking at the year before (up to November 2019), just over half of respondents (51%) had stayed in a self-catering property once or twice. A further 41% stayed three or more times with just 8% saying they did not stay in a self-catering property during this time.

Figure 3.2: Number of visits to self-catering properties in the past 12 months (up to and including November 2019)

Source: Frontline Self-Catering Visitor Survey, 2021

N=714

Covid-19 was the main reason for the decrease in stays during 2020.

4.2 Visitor characteristics

This section looks at findings from visitors for up to two visits to a self-catering property. Visit 1 is the most recent visit i.e., 2020 and visit 2 is pre-Covid-19 i.e. 2019. On average visitors spent 6.2 nights during visit 1 and 6.3 nights in visit 2. The distribution of responses is shown in Figure 3.3 and demonstrates a very consistent trend between visit 1 and 2.

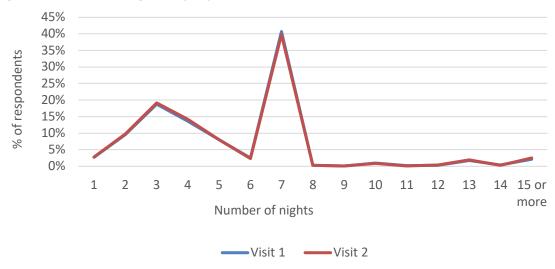

Figure 3.3: Number of nights stayed per visit

Source: Frontline Self-Catering Visitor Survey, 2021

N=567

Figure 3.4 shows the month in which the visits began. For visit 1 (2020) August, September and October were the most popular with significantly fewer visiting in March – June (compared with visit 2 (2019)). This was due to the lockdown measures imposed in March last year followed by the easing over the summer.

Looking at visit 2 (2019) there is a more even distribution across the months with a slight peak over July to October.

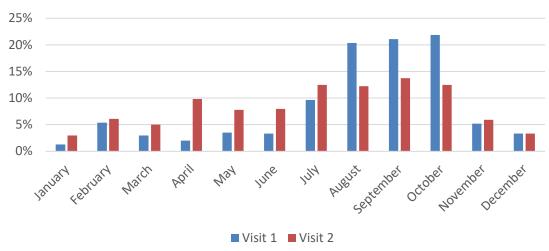

Figure 3.4: Month during which visit began

Source: Frontline Self-Catering Visitor Survey, 2021 N= 540

Tables 3.3 and 3.4 shows the number of adults, children and pets in each party for visit 1 (2020) and visit 2 (2019).

During visit 1 (2020), the average adult group size was 2.7 and 29% of groups included children. Where parties were travelling with children, the average number of children in each group was 2. 37% of groups brought a pet.

Table 3.3: Number of adults, children and pets in each group during visit 1 (2020)

	Number of adults	Number of children	Number of pets
1	3%	28%	67%
2	65%	50%	26%
3	11%	15%	7%
4	12%	5%	
5	3%	1%	
6	3%	0%

4.4 Impacts of Covid-19

Respondents were asked, as a result of Covid-19, which statement best applies:

Figure 3.7: As a result of Covid-19

N=717

58% said self-catering in the UK was always my preference followed by 18% now choosing self-catering over going overseas.

On a scale of 1 (not likely at all) to 10 (very likely), visitors were asked to what extent they were likely to continue using self-catering in the future. 95% rated their likeliness to stay in self-catering in the future as 7 or more out of 10, with 78% rating 10.

90% 78% 80% 70% % of respondents 60% 50% 40% 30% 20% 10% **7**% 10% 3% 1% 1% 0% 0% 0% 0% 0% 2 1 3 4 5 6 7 8 9 10 (1 Not likely at all – 10 Very likely)

Figure 3.8: Extent to which visitors were likely to use self-catering in the future

N= 717

Over two-thirds (74%, 406) of respondents said that they have had to cancel plans to holiday with people from outside of their household due to Covid-19.

On a scale of 1 (not very important) to 5 (very important), visitors were asked, as a direct result of Covid-19, how important the cleaning standards are in their choice of self-catering accommodation. Almost all (99%) rated this 3 or more, with 84% saying very important.

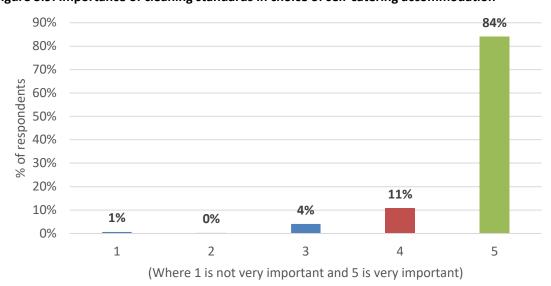

Figure 3.9: Importance of cleaning standards in choice of self-catering accommodation

N=718

Using the same rating scale of 1 (not very important) to 5 (very important), visitors were then asked, how important is having flexible cancellation terms due to Covid-19. Almost all rated this 3 or above (99%) and 88% said very important.

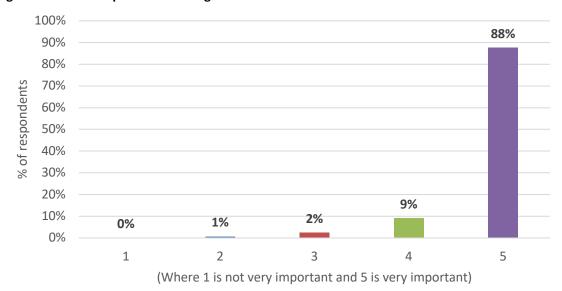

Figure 3.10: How important is having flexible cancellation terms due to Covid-19

N=717

Key features of flexible cancellation terms included:

- a full refund (73%, 518)
- ability to rebook with the same terms and conditions (69%, 497)
- refundable deposit (48%, 342)

5 Findings from Economic Impact Assessment

This section highlights the economic impacts that have occurred as a result of visitors use of self-catering properties in the UK in 2019 and 2020. This assessment was conducted in accordance with HM Treasury *Green Book* appraisal and evaluation guidance.

As part of this analysis, we measured the economic value of the sector, using the following five key indicators:

- 1. **Number of properties:** the number of self-catering properties that are available in Scotland, using data supplied to us by the ASSC.
- 2. **Visitor nights per year:** the total number of overnight stays that took place in self-catering properties in Scotland over the course of 2019 and 2020, based on a review of transaction records provided to us by SuperControl (see Appendix 1 for occupancy breakdown).
- 3. **Total visitor spend:** the total combined value of all expenditure made by visitors to the country during the course of 2019 and 2020, including the money that they spent on accommodation fees, travel to and from the properties, travel during their stay, food and drink (in shops, supermarkets pubs and bars), other shopping, outdoor recreation and trips to visitor attractions, based on evidence of visitor spending patterns acquired through our survey of visitors to Scottish self-catering properties.
- 4. **Total full time equivalent (FTE) jobs supported:** the total number of full-time equivalent jobs that the self-catering sector support in the local economy, through money spent in Scotland by visitors to self-catering properties. A full-time equivalent job can be defined as the number of full time (35 hour per week) permanent (52 week per year) jobs that this expenditure supports¹¹.
- 5. Total economic contribution: the total amount of Gross Value Added (GVA) in each area that can be attributed to expenditure by visitors to self-catering properties. The term GVA can be defined as the total amount of extra value that visitor expenditure contributes to the economy. This is broadly equivalent to either wages plus profit (i.e. the proportion of value added that goes to the company's employees and the proportion that goes to the company's owners) or to turnover minus cost of sale. For example, if a company were to buy enough coffee beans to make 100 cups of coffee for £40, and sell each cup for £1 each, the turnover impact of these transactions would be £100, the cost of sale would be £40, and the value added would be £60.

In the case of FTE jobs supported, and total economic contribution, the analysis includes indirect and induced expenditure that has occurred as a result of the multiplier effect, such as money spent by the employees of self-catering businesses, and by the business itself in the local economy.

Detailed results tables are provided in Appendix 2, a glossary of technical terms in Appendix 3, and a description of the economic impact calculation methodology in Appendix 4.

This section presents a summary of the visitor expenditure, GVA and full-time equivalent (FTE) employment impacts of the self-catering sector in Scotland, broken down by region.

AS1006-00 Scotland 69

¹¹ As some people work part time or seasonally, and as some workers spend part of their time providing services to tourist visitors and some of their time providing services to local residents, the total number of workers who jobs are at least partially dependent on self-catering visitors will be higher than this figure.

5.1 Impact by Scottish region

It is estimated that in 2019 visitors to Scottish self-catering properties spent a total of £867.1m in the economy. This visitor expenditure supports 23,979 FTE jobs and contributed £489.3m of GVA to the Scottish economy. This resulted in a total economic contribution of £672.3m.

In 2020 visitors spent a total of £614.8m in the economy. This visitor expenditure supports 17,002 FTE jobs and contributed £346.9m of GVA to the Scottish economy. This resulted in a total economic contribution of £476.7m. This was a 29% reduction to the previous year. Tables 5.1 and 5.2 summarise the impact at a regional level in 2019 and 2020. The section that follows provides an infographic summary of impact findings for Scotland for 2019 as this was a more 'typical year'.

Table 5.1: Economic impacts by Scottish region 2019

	Total visitor	Total visitor	Total GVA	Total FTE	Total economic
	nights	spend (£m)	impact (£m)	employment	contribution (£m)

Appendix 1 - SuperControl Occupancy Data

Occupancy figures are likely to underestimate the true occupancy rate as:

- there were some days in 2020 when each property was not available for occupancy due to Covid-19 restrictions (though some of the unfulfilled bookings for these nights will still be in the database)
- some properties may have been available for booking through a range of different platforms, and therefore there may be some bookings that are not captured in this database
- some owners may have only made their properties available for booking some of the time, and either occupied them themselves, rented them on a tenancy basis, or closed them for maintenance or for the off-season at other times of the year

Scotland

Occupancy rates, 1st January 2019 to 31st December 2019

N= 4,594 properties

Occupancy rates, 1st January 2020 to 31st December 2020

N= 4,867 properties

Appendix 3 – Glossary of Technical Terms

Total visitor spend: money spent by visitors to the area (this does not include any money spent further down the supply chain through multiplier effects).

Full time equivalent (FTE) employment impacts: the number of full time (35 hour per week) permanent (52 week per year) jobs that this expenditure supports. Note that as some people work part time or seasonally, and as some workers spend part of their time providing services to tourist visitors and some of their time providing services to local residents, the total number of workers who jobs are at least partially dependent on self-catering visitors will be higher than this figure.

Gross value added (GVA): the total amount of extra value that visitor spend contributes to the economy. This is broadly equivalent to either wages plus profit (i.e. the proportion of value added that goes to the company's employees and the proportion that goes to the company's owners) or to turnover minus cost of sale. For example, if a company were to buy enough coffee beans to make 100 cups of coffee for £40, and sell each cup for £1 each, the turnover impact of these transactions would be £100, the cost of sale would be £40, and the value added would be £60.

Indirect multiplier (or Type I multiplier): additional knock-on benefits that take place as a result of payments made further down the supply chain. Examples may include money that the owner pays to a local accountant to do produce their accounts, or to a local tradesperson to fix any plumbing or electrical problems that might occur in the property.

Induced multiplier: additional knock on benefits caused by the expenditure of salaries by property owners and staff. An example may include the expenditure of people who work at the property in a local shop.

(the) Multiplier effect (or Type II multiplier): this term relates to the combined impacts of the indirect and induced multipliers.

Occupancy rate: the proportion off properties that have a paying visitor staying in them on any particular day of the year.

Turnover: the total value of all sales made by a business.

Appendix 4 – Economic Impact Methodology

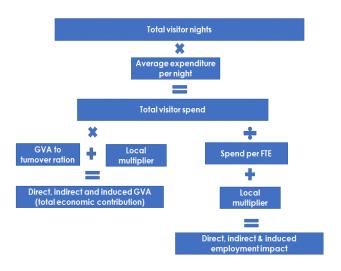

As part of the economic impact model, a net economic impact figure was calculated for every possible combination of:

• day of the year: we applied different occupancy rate assumptions to each of the days in 2019 and 2020, based on evidence from our analysis of SuperControl data

In other words, the model includes over a separate economic impact calculation, which were then reaggregated to produce as accurate as possible an estimate of the true economic impact of the sector.

For each of these combinations of date, we calculate our impact based on the following equation:

Economic impact calculation summary

Introduction

Background Information and Aim

This report provides a summary of statistics on tourism in Scotland's Edinburgh and Lothians region. It gathers information from a suite of tourism monitors managed by VisitScotland's Insight Department, and other national statistics and commissioned research.

Most of the statistics are produced from surveys. The primary surveys used are:

- The Great Britain Tourism Survey (GBTS) that provides data for overnight visitors resident in Scotland, England and Wales. The survey is conducted through face-to-face interviews and is jointly commissioned by VisitScotland, VisitEngland and VisitWales. More information about the survey can be found on visitbritain.org.
- The International Passenger Survey (IPS) which is run by the Office for National Statistics (ONS). This survey provides data for overseas visitors. Details about the survey and methodology used can be found on the ONS website and the VisitBritain website.
 - **Please note:** In 2020, the methodology of IPS was revised to represent more accurately international visitors and all data was recalculated back to 2009. As a result, international figures in this report might differ from, and supersede, previously published IPS data.
- The Great Britain Day Visits Survey (GBDVS) that provides data for tourism day visitors resident in Scotland, England and Wales. More information about the survey can be found on visitbritain.org.
- The Scottish Accommodation Occupancy Survey (SAOS) that provides data on occupancy in Scotland's tourist accommodation sectors.

While results from these surveys can give good precision at national level, at regional level they can be less reliable because they can be based on a relatively small sample size. This incurs a larger margin of statistical error reducing data reliability. Therefore results should be treated with caution. To reduce error margins, it is sometimes useful to take an average over three years to provide a larger sample size. In this report, 3-year average figures have been calculated to provide a more robust basis for analysis of detailed data such as purpose of travel, seasonality and average duration of trips.

There are some differences between regions as identified by the GBTS and GBDVS, IPS, and SAOS. Both international and domestic visitor figures are reported at Edinburgh and Lothians regional level to allow for summing of figures and comparative analysis. Domestic figures are also available at local authority level, and these have been provided in addition where sample size allows. International data is only available for Edinburgh and Lothians as a whole, and partially for the Lothians combined (East Lothian, Midlothian and West Lothian) and the City of Edinburgh.

This report starts with an **overall** evaluation of Edinburgh and Lothians tourism performance in 2019. It then looks in more detail into the **international** and **domestic** overnight visitors to the region and, if figures allow, provides sub-regional or council area breakdown. Lastly, the report focuses on tourism day visits and the historical trend of tourism performance in the region since 2013.

Visitors to Edinburgh & Lothians

Tourism Performance | 2019

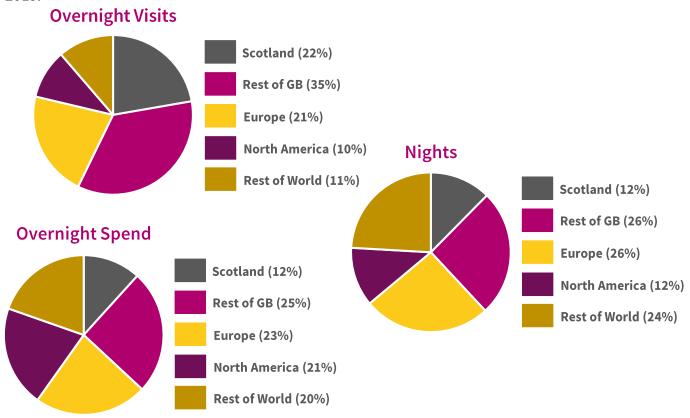

In 2019, Edinburgh and Lothians was the **most popular** Scottish region to visit for both domestic and international travellers. It accounted for **31% of all overnight visits** and **34% of the total overnight tourism expenditure** on national level.

At 5.3 million, overnight trips were 1% fewer than in 2018. Yet, total overnight spend (£2 billion) and the number of bednights (20.7 million) both grew in 2019, by 2% and 9%, respectively.

The rise in overnight spend was driven by **international visitors** who spent roughly £50 million more in Edinburgh and Lothians in 2019. Indeed, overseas residents remained essential for the region's tourism performance, accounting for 43% of all overnight trips and 63% of all overnight spend – the **highest shares among all of Scotland's regions**. Nevertheless, the importance of the domestic market for Edinburgh and Lothians continued to grow in 2019. In particular, there were notable increases in **Scotland residents'** overnight trips (+25%) and spend (+41%) in the region which reached record-high levels.

2019 witnessed some changes to Edinburgh and Lothians' visitor mix, with **Scottish** and **North American** visitors increasing, and Continental Europe residents decreasing in numbers. Trips by English and Welsh travellers remained largely unchanged.

Figures indicate a roughly one-sixth **decrease in domestic day tourism** to Edinburgh and Lothians from 2018. Despite this, day tourism spend was the second highest between 2015 and 2019.

II. International Visitors to Edinburgh & Lothians Overnight Tourism

International travellers visited Edinburgh and Lothians **2.3 million** times in 2019, which means that the region was either the main destination or part of a wider journey for **two in three** international visits to Scotland. While trips were 12% down from 2018, international **bednights and spend** in the region were the **highest on record**. This was result of a 23% increase in the average length of stay that also led to an 18% rise in the average spend per trip. Overseas residents prefer to visit Edinburgh and Lothians in the warmer months; still, the biggest increase in travel was observed between October and December. **Holidaying** remained the main reason to visit the region, while VFR trips dropped by a third from 2018.

III. Domestic Visitors to Edinburgh & Lothians

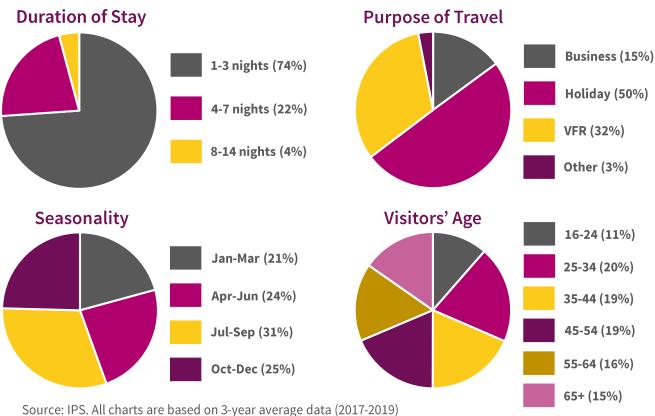

Overnight Tourism

In 2019, British residents made **3.1 million** overnight trips to Edinburgh and Lothians, spending 7.9 million nights and £731 million. While the number of **visits and bednights** both **increased** from 2018, the rise in domestic tourism to the region did not match the notable growth observed on national level. This was mostly due to the high proportion of English travellers – undertaking 59% of the domestic visits to Edinburgh and Lothians – who made slightly more trips but spent less money in 2019. Nevertheless, Edinburgh and Lothians attracted **22% of the visits** and **23% of the total domestic overnight spend in Scotland**.

Most Popular Activities Undertaken as Part of a Day Trip, Edinburgh and Lothians: 2016-18 Average Annual Figures (Number of Day Trips in Millions)

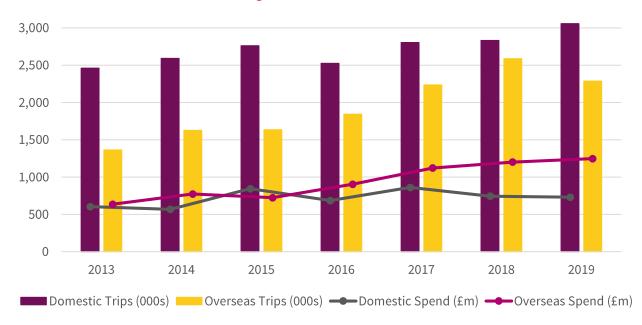

Visitors to Edinburgh & Lothians

Historical Trend Information | 2013 - 2019

In 2019, the total **overnight number of trips and tourism expenditure** in Edinburgh and Lothians were the **second highest on record**. The significance of international tourism in the region is great and in recent years the rise of overseas visitors has exceeded the growth of the domestic market. However, British residents also show increased interest in travelling to Edinburgh and the Lothians, with domestic trips **increasing by 10**% from 2014-2016 to 2017-2019. International visits **rose by 39**% over the same period, yet 2019 was the first year in which international travel declined since 2012.

SAMPLE SIZES

Analysis of sub-groups, such as trips by purpose or demographic group, relies on smaller sample sizes that can be unreliable. Where this is a particular issue, methods to aggregate data, such as using a 3-year average instead of single-year data, have been used. Before using the data, it is important to recognise the limitations of using a small sample size. Further information, including methodology and sample sizes, can be found on the VisitBritain website www.visitbritain.org (Insights & Statistics section).

c/o Houghton Planning Ltd Per Paul Houghton MRTPI Alloa Business Centre Whins Road Alloa Clacks FK10 3RF

DECISION TYPE: Application Refused

REPORT OF HANDLING

PROPOSAL

The property to which this application relates is a top floor flat within a two and a half storey flatted building situated on the north side of, and at the western end of, New Street in Musselburgh. The flatted building is located within a predominantly residential area as defined by Policy RCA1 of the adopted East Lothian Local Development Plan 2018.

The flatted building is bounded to the north by a public car park with the Promenade and Fisherrow Sands beyond, to the east and west by neighbouring residential properties and to the south by a public car park.

Planning permission is retrospectively sought for the change of use of the residential top floor flat of Flat 6, 139 New Street, Musselburgh as a three bedroom unit of short term self-catering holiday let accommodation.

No alterations have been undertaken to the flat, either internally or externally, to facilitate the retrospective change of use.

Subsequent to the registration of this application the applicant's agent has confirmed in writing that (i) the flat has been marketed/used for short term lets since December 2019; (ii) the minimum length of stay is 3 days and the most common length of stay is between 5-10 days; (iii) the maximum number of visitors in one booking is 5 guests; (iv) recycling and/or bins are emptied every week by ELC waste management services and the flat is cleaned after each stay by a cleaning company; (v) the property is managed by a letting agency who oversee the day-to-day management of the property; (vi) there is a key box provided for guests to collect and drop off keys; (vi) there are 6 flats within the building (2 flats per floor) and that the applicant's flat, the subject of this retrospective planning application, is accessed via a shared front and rear entrance door, a shared hallway and a communal stairwell; and (vii) the flat benefits from an allocated private underground car parking space and that there are also 42 shared parking spaces for visitors outside the apartment complex.

DEVELOPMENT PLAN

Section 25 of the Town and Country Planning (Scotland) Act 1997 requires that the application be determined in accordance with the development plan, unless material considerations indicate otherwise.

The development plan is National Planning Framework 4 (NPF4) and the adopted East Lothian Local Development Plan 2018.

Policies 13 (Sustainable transport) and 30 (Tourism) of NPF4 are relevant to the determination of this application. Policies RCA1 (Residential Character and Amenity), T1 (Development Location and Accessibility) and T2 (General Transport Impact) of the adopted East Lothian Local Development Plan 2018 are relevant to the determination of this application.

REPRESENTATION

Five objections to this application have been received. The main grounds of objection are:

- (i) there are a total of 6 flats within block 139 which all share a common entrance and stair;
- (ii) it appears as though holiday lets which share communal entrance doors, hallways or stairs with other residential properties are prohibited in East Lothian and this applies to this property;
- (iii) the holiday let has resulted in noise, nuisance, police incidents and anti-social behaviour in the internal common stair and within the car parking area which have been reported;
- (iv) guests staying at the property press the wrong buzzers, and sometimes try to gain entry into the wrong flats, late at night and early morning;
- (v) the applicant has been approached about the nuisance guests are causing by a neighbouring resident who claims that they were told they shouldn't live in a tenement building if they want peace and quiet;
- (vi) when guests are asked to respect a residential stair they respond with 'we are here to party and are on holiday';
- (vii) the flat has a balcony and music is occasionally played at night;
- (viii) people are coming and going at all times of the day and night and concerns are raised relating to security as it is claimed that permanent residents do not know the strangers entering the building and using the stair;

- (ix) some arrivals and departures of guests are at unsociable times and suitcases can be heard being trundled up and down the stairs, and outside on the tarmac, which disturbs sleeping residents:
- (x) there is irregular comings and goings by strangers which causes distress and disturbance to the elderly residents in the building and which impacts upon their amenity;
- (xi) the level of security, particularly within the stairwells of the building, is being compromised;
- (xii) there has been a number of cleaners and maintenance people arriving and departing on a regular basis as a consequence of short term lets within the apartment complex; and (xiii) guests have not been disposing rubbish correctly.

COMMUNITY COUNCIL COMMENTS

None.

PLANNING ASSESSMENT

This application seeks retrospective planning permission for the change of use of a three bedroom top floor flat to a three bedroom unit of holiday let accommodation. The holiday let comprises of three bedrooms (one of which has an en-suite), a bathroom and a large open plan living/kitchen area. The applicant's flat is capable of accommodating/sleeping 5 people.

The East Lothian Economic Development Strategy 2012-22 identifies tourism as one of the strengths of the East Lothian economy and a source of employment opportunities in the future and the adopted East Lothian Local Development Plan 2018 states that a range of hotel, guest house and other accommodation attracts visitors and encourages them to stay and benefit the economy of East Lothian. The adopted East Lothian Local Development Plan 2018 states that all leisure and tourism related development proposals, including visitor attractions, hotels and holiday accommodation, will be assessed against all relevant Local Development Plan policies.

The change of use of the residential flat to a holiday let provides holiday accommodation within Musselburgh that attracts visitors and encourages them to stay in East Lothian, which supports the existing long established business and benefits the wider economy of East Lothian.

The adopted East Lothian Local Development Plan 2018 does not contain a specific policy on the change of use of flats to holiday lets. However, part e) of Policy 30 (Tourism) of NPF4 states that:

Development proposals for the reuse of existing buildings for short term holiday letting will not be supported where the proposal will result in:

(i) An unacceptable impact on local amenity or the character of a neighbourhood or area; or (ii) The loss of residential accommodation where such loss is not outweighed by demonstrable local economic benefits.

Policy RCA1 (Residential Character and Amenity) of the adopted East Lothian Local Development Plan 2018 states that the predominantly residential character and amenity of existing or proposed housing areas will be safeguarded from the adverse impacts of uses other

than housing. Development incompatible with the residential character and amenity of an area will not be permitted.

In the determination of this application it is necessary to assess the impact of the change of use on the amenity of the existing residential properties contained within the residential flatted building to which the applicant's flat forms a part.

The Council's Senior Environmental Health Officer advises that whilst the normal use of a property would not result in loss of amenity to neighbours, the use of properties for short term holiday lets can result in future guests misusing and abusing the property in a manner that is antisocial and can result in a significant impact upon amenity of neighbours. However, it is stated that the Council's Environmental Health Service cannot assume that antisocial behaviour issues will arise and thus cannot impose any enforceable conditions to protect the amenity of neighbours.

The Council's Antisocial Behaviour Team advise that Fisherrow car park, which is nearby, is a locus of anti-social behaviour. However, they advise that there are no records of any incidents relating to any antisocial behaviour matters at this address and thus they raise no objection to this retrospective planning application.

Police Scotland advise that there have been no police incidents at this address (having checked their records from 2020 onwards) and thus they raise no objection to this retrospective planning application.

The Council's Road Services raise no objection to this retrospective application and note that the supporting statement submitted with this application confirms that no internal changes are proposed. They state that whilst there may be some increase in the number of vehicles during the peak tourist season compared to residential use, this increase is likely to even out throughout the year resulting in no noticeable difference in overall car parking demand. Accordingly, the proposals do not conflict with Policy 13 of NPF4 or with Policies T1 and T2 of the adopted East Lothian Local Development Plan 2018.

The applicant's property is a three bedroom flat located at third floor level within the three storey residential flatted building of 139 New Street which contains a total of 6 residential properties (2 flats per floor). The property the subject of this retrospective application shares a communal front and rear entrance door with five other residential properties within the flatted building and an internal communal stair with three other residential properties within the flatted building. The existing hallway serving the applicant's third floor flat also serves one other top floor flat within the building.

The use of the application property as a holiday let enables it to be let out for short stays resulting in a turnover of people over short time periods with a significant proportion of occupants likely to be visitors. Such a regular turnover of users/occupants would change the nature of comings and goings not only to the application property itself but also within the communal entrances, internal stair and hallway of the residential building. Most users/occupants of the holiday let would have a degree of luggage or other property to take through the communal entrances, stair and hallway which in itself would lead to a level of disturbance and nuisance not associated with the permanent/long term residential use of the property. This is harmful to the amenity of the occupants of the residential properties within the residential flatted building of 139 New Street, Musselburgh. It is accepted that permanent

residents may also make noise but they tend to keep their luggage in their homes and do not move them with the same frequency as regularly changing guests who arrive and depart sometimes at unsociable hours, and this differs from typical residential circumstances.

Along with the extra comings and goings of users of the holiday let at check in/check out there is also an additional level of activity not only at the application property but also within the communal entrances, stair and hallway as a result of people regularly accessing both the main building of 139 New Street and the application property itself to service/clean it and remove waste and recycling material after each guests stay. This level of additional activity is evidently different to that expected with the permanent/long term use of the flat as a private residence again which is harmful to the amenity of the occupants of the residential properties within the residential flatted building of 139 New Street, Musselburgh.

Moreover, allowing frequently changing guests unfettered access to otherwise secure shared areas changes the actual and perceived level of security for the existing permanent residents. Whilst the permanent residents are likely to have visitors of their own from time to time, those permanent residents would remain in control of security to communal areas. The introduction of frequently changing guests regularly into these secure areas, independent of the owner, would therefore differ from typical residential circumstances.

Given the specific circumstances and location of the application property within the residential building of 139 New Street, Musselburgh which contains a number of permanent/long term residences and which shares a communal front and rear entrance, stair and hallway, the retrospective change of use of the applicant's third floor flat as a three bedroom unit of short term self-catering holiday let accommodation is incompatible with and harmful to the amenity of the occupiers of the residential properties within the residential building of 139 New Street, Musselburgh. By having an unacceptable impact on local amenity, the proposal is contrary to part e) of Policy 30 of NPF4 and with Policy RCA1 of the adopted East Lothian Local Development Plan 2018.

It is now necessary to assess the impact of the change of use on the loss of residential accommodation where such loss is not outweighed by demonstrable local economic benefits as is stated in part e) of Policy 30 of NPF4.

The Council's Housing Strategy & Development Service state that the change in use of this property from a long term residential dwelling to a short term let is considered a significant loss because (i) Musselburgh is part of a constrained housing system and the housing need outstrips the supply; (ii) there is an existing concentration of short term lets within the area; and (iii) the property is not an established short term let. Accordingly, the Council's Housing Strategy & Development Service object to this retrospective planning application.

The Council's Economic Development Service Manager advises that there are demonstrable local economic benefits delivered by all types of short term holiday lets in East Lothian and that existing provision of this type of accommodation must be retained, protected and supported where there is no demonstrable impact on local amenity, the character of the area or loss of residential accommodation. In the particular circumstances of this case it is stated that (i) the property will provide high quality tourist accommodation attracting visitors to Musselburgh and the surrounding area providing economic benefit; (ii) there is a demonstrable economic benefit to having a wide range of accommodation types in East Lothian with the tourism sector contribution £155m to the local economy in 2021 and supporting 10% of the

workforce; (iii) non-serviced accommodation (short term holiday lets) contributes positively to the local economy (£279m in 2019) and the applicant's flat accounts for 5 bedspaces and a potential annual economic impact of £113,635 and 2.5FTE jobs; (iv) there is an increasing number of overnight stays in East Lothian for work purposes (which is expected to increase over the next 10-15 years) such that the loss of short term accommodation is likely to have a significant negative impact on the local tourist economy in monetary and reputational terms. Therefore, the Council's Economic Development Service Manger supports this planning application stating that the change of use of the flat to short term holiday let accommodation supports the strategic goals and objectives of the Economic Development Strategy 2012-2022 and the intent and outcomes of part e) of Policy 30 of NPF4.

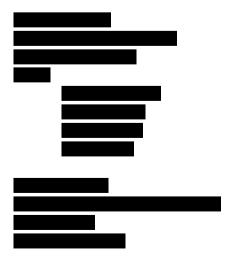

However the local economic benefits associated with the use of the applicant's flat operating as a three bedroom unit of short term self-catering holiday let accommodation does not outweigh the unacceptable impact on local amenity. Therefore, the change of use is not in accordance with the Development Plan and there are no material planning considerations that outweigh the fact that the change of use is not in accordance with the Development Plan.

The application property of Flat 6, 139 New Street, Musselburgh as a holiday let is unauthorised and a breach of planning control. Enforcement action will be taken to ensure the cessation of the holiday let use with the period for compliance with the enforcement notice being three months.

REASON FOR REFUSAL:

The holiday let use of the flatted property is incompatible with and harmful to the amenity of the occupants of other flatted properties used as residential dwellings within the residential building of 139 New Street and as such is contrary to part e) of Policy 30 of National Planning Framework 4 and Policy RCA1 of the adopted East Lothian Local Development Plan 2018.
